Understanding Proposal Budgets

Topics to be covered include:

- Responding to budget requirements by sponsor
- AY salary vs summer salary
- Including partners and/or subcontracts
- F&A and why it's necessary
- Importance of the budget justification
- Evaluating cost share requirements
- Defining Purdue's policy on cost sharing
- How to get assistance with your budget

Understanding Proposal Budgets

Importance of a Budget:

- Outlines the project in fiscal terms
- Budget items give an in-depth understanding of how the project will be structured and managed
- Helps reviewers determine if the project is:

FEASIBLE

Understanding Proposal Budgets

Costing Basics:

- Costing Policy requires that all expenditures for sponsored projects meet the following criteria:
 - **REASONABLE** – Cost a prudent person would have agreed to under the circumstances (newspaper test).
 - **ALLOWABLE** – Must be allowable under any limitations or exclusions within the announcement, award, sponsor, or university guidelines.
 - **ALLOCABLE** – Charges are assigned to benefiting accounts in accordance with the benefits received. May be assigned as either direct or indirect costs.

Understanding Proposal Budgets

Costing Basics:

- Why is it important to make sure a proposal is properly costed?
 - Ensure processes and systems are designed in accordance with government regulations
 - Ensure sponsors bear their fair share of total project costs
 - Ensure consistency in proposal budgeting
 - Proposed budget should be sufficient to carry out all program deliverables

Understanding Proposal Budgets

Key Considerations:

- How does Pre-Award support Investigators in proposal preparation?
 - Investigators – Know the **RESEARCH**
 - Pre-Award – Knows the **BUDGET**

- *Investigators must be able to communicate the budget needs to Pre-Award in order to build a successful proposal budget.*

Understanding Proposal Budgets

Key Considerations:

- Review the Program Announcement (PA, RFP) and the applicable budget guidelines for allowable and unallowable costs.
- Some sponsors have general budget considerations not specific to a program (NSF, NIH).
- Identify budget considerations:
 - Minimums/maximums
 - Unallowable costs
 - Salary limitations
 - Required budget items (travel, salary, etc)
 - Cost Share Requirement
 - F&A Restrictions

Understanding Proposal Budgets

Key Considerations:

- Identify the costs necessary to successfully complete the Scope of Work (SOW)
- *Questions to Consider:*
 - How and where will the project be completed?
 - Who is needed to complete the project? How much of their time?
 - What items are needed to complete the project?
 - Will any partners be involved?
 - Will any travel be necessary?
 - Do I have the equipment needed for the project?

Understanding Proposal Budgets

DIRECT COSTS VS INDIRECT COSTS

"Direct Costs"

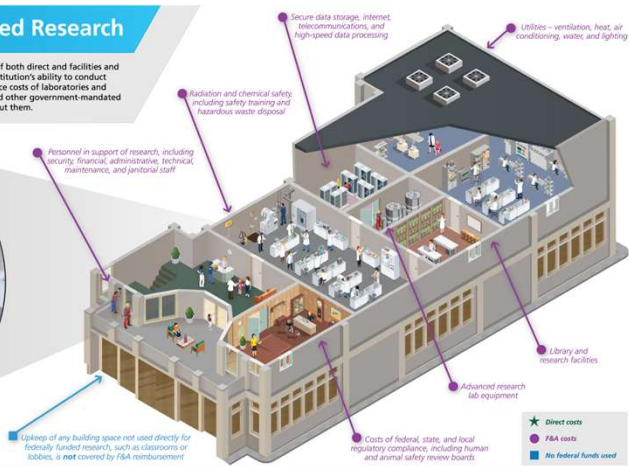

Costs of Federally Sponsored Research

The total cost of federally sponsored research includes a combination of both direct and facilities and administrative (F&A) costs. Both types of expenditures are key to an institution's ability to conduct cutting-edge research. F&A consists of the construction and maintenance costs of laboratories and high-tech facilities; energy and utility expenses; and safety, security, and other government-mandated expenses. These costs are real and research cannot be conducted without them.

"Indirect Costs"

★ Direct costs - These expenses solely cover research and include lab supplies and equipment; salaries and stipends for researchers and graduate students; and travel costs for conducting and sharing research

★ Direct costs
● F&A costs
■ No federal funds used

Understanding Proposal Budgets

Components of a Budget:

- Direct Costs
 - Costs that can be identified specifically for a particular sponsored project
 - Costs that can be directly assigned to such activities relatively easily with a high degree of accuracy

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Salaries and Wages
 - Identify personnel needed to complete the work
 - Principal Investigators, Research/Professional Associates, Research Assistants, Post Docs, Grads, Technicians
 - Budgeted as a percentage of time. Examples:
 - 10% AY
 - 2 weeks summer – 100%
 - Some sponsors require person months
 - Must follow college and/or department guidelines
 - Some require AY time for faculty
 - Specific starting salaries for grads and post docs

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Salaries and Wages – Summer vs AY
 - Summer – Faculty with a 9-month appointment can budget up to 100% of summer.
 - Summer salary is budgeted at an inflated rate to account for Purdue Summer Pay Policy.
 - Academic Year (AY) – AY time should be budgeted as needed to complete the project and in accordance with departmental guidelines.
 - Most departments offer course releases if a specific amount of AY time is budgeted (example: 20% per course per semester)
 - Some departments have AY requirements

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Salaries and Wages
 - Fringe benefits budgeted as a percentage of salary at a rate determined annually by Managerial Accounting Services based on averages by employment category
 - Graduate Fee Remissions budgeted at a monthly rate based on the time budgeted per Grad
 - Inflated annually

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Why should we not over-commit key personnel?
 - Budgeting 100%--are there no other responsibilities?
 - All activities must be taken into consideration
 - Look at commitment across all sponsored projects

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Consultants
 - Outside services necessary to complete the work
 - Not provided by University personnel
 - Service provided is routine in nature and not collaborative
- Participant Support
 - Stipends or subsistence allowances, travel allowances, and registration fees paid to or on behalf of participants or trainees (not employees)
 - Limited to conference or training grants
- Equipment
 - Specifically needed for the project
 - Must be a single unit over \$5,000
 - Are renovations needed? Will it fit through the door?

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Subcontracts
 - Collaborations with other institutions/agencies
 - Substantive, participating in the results, publications, and presentation of the research

Budget Considerations:

- Consider giving each partner/subawardee a target budget early in the process
- Purdue only collects indirect costs on the first \$25K of each subcontract

Understanding Proposal Budgets

Components of a Budget: Direct Costs

- Travel
 - Field Work, Collaborative/Professional Meetings, Periodic Agency Meetings (Agency Required)
 - Include mileage, rental car expense, parking, airfare, per diem (meals)
- Supplies and Expenses
 - Resources necessary to complete the work
 - Estimate as close as possible
 - Sufficient supplies (lab, animals, chemicals, etc)

Understanding Proposal Budgets

Components of a Budget: Indirect Costs

- Costs that are incurred for common or joint objectives
 - Depreciation and Use Allowances (building and equipment)
 - General, Sponsored Programs, Student, and Departmental Administration
 - Operation and Maintenance Expenses
 - Library Expenses
 - Office Supplies and Copying
 - Basic Local Telephone Services On Campus
 - Journals and Subscriptions, Memberships

Understanding Proposal Budgets

Facilities & Administration (F&A)

- West Lafayette F&A Rates
 - Research = 57%
 - Other Sponsored Programs (OSP) = 38%
 - Off Campus = 26%
 - Applied Research (Special Intellectual Property Terms) = 64.07%
- Other terms used to describe F&A
 - Indirect Costs, IDC, or overhead
- Criteria for off campus rate:
 - Activity necessitates an off-campus location, is for a full semester or summer session, and in a project leased space

**Negotiated between Purdue
and Department of Health
and Human Sciences
(DHHS) every 3 years**

Understanding Proposal Budgets

Modified Total Direct Costs (MTDC)

- F&A Costs are charged as a percentage of direct costs
- If a project is bearing the full negotiated F&A rate, that rate is always applied to the MTDC base. MTDC exclusions include:
 - Capital equipment
 - Participant Support Costs
 - Tuition/Tuition Remissions
 - Scholarships and Fellowships
 - Alterations and Renovations
 - Cost of renting/leasing project space or equipment
 - Portion of each sub-award over \$25K
- Example:

Cost Category	Expense	Explanation
Salaries	\$150,000	
Supplies	10,000	
Equipment	40,000	MTDC Exclusion
Total Direct	\$200,000	
Indirect Cost (57%)	91,200	\$200,000-\$40,000 = \$160,000 * 57%
Total Sponsor Cost	\$291,200	

Understanding Proposal Budgets

Modified Total Direct Costs (MTDC)

- Example:

Cost Category	Expense	Explanation
Faculty Salaries	\$150,000	
Grad Salaries	25,000	
Grad Fee Remits	12,000	MTDC Exclusion
Supplies	10,000	
Subcontract	100,000	>\$25,000 excluded from MTDC
Equipment	40,000	MTDC Exclusion
Total Direct	\$337,000	
Indirect Cost (57%)	119,700	\$337K - \$12K - (\$100K-\$25K) - \$40K = \$210K * 57%
Total Sponsor Cost	\$456,700	

Understanding Proposal Budgets

Components of a Budget: Facilities & Administration Costs (F&A)

- When will Purdue accept limitations on F&A?
 - Accepted when limited in published guidelines by Not-for-Profits and Foundations
 - Mission/goals of these types of organizations are to benefit the public well being as a whole
 - Industrial proposals less than or equal to \$10K*
 - **When considered seed funding*
- Why can't Purdue accept limitation on F&A for For-profit entities?
 - F&A costs are REAL costs to the University
 - If granted, PU would be subsidizing a For-Profit entity

Understanding Proposal Budgets

Budget Justification:

- Budget narrative must be provided to support the proposed budget
 - Explains the financial picture of the project
 - Budget should be realistic and justified by the aims and methods of the project
 - Provide any other information that will aid the sponsor in evaluating and funding the proposed item or cost
 - Needs to match what is in the budget

What is cost sharing?

Cost sharing is any project-related cost that is not reimbursed by the sponsor to support the scope of the project.

These costs can be provided by the primary applicant, subrecipient, or third parties as either cash or in-kind contributions.

- Our university cost sharing contributions are almost always considered a cash contribution, as there is cash being transacted to provide the contribution (real costs of personnel, equipment, and associated indirect costs).
- In-kind contributions are more common with third parties and typically involve a donation of time, space, or facilities usage. The value of the contribution must be readily determined, verified, and justified.

Types of Cost Sharing

1. **Mandatory cost sharing:** institutional support that is required in writing by the granting agency, and the amount is specified in a granting agency's written solicitation.
2. **Voluntary committed cost sharing:** institutional support committed to the project solely at the discretion of the institution. These resources are pledged formally in a proposal and thereby become binding commitments that the granting agency may audit.
3. **Institutional support/leverage:** institutional resources not specified as mandatory or committed specifically yet discussed in the proposal as organizational resources or infrastructure necessary for, and available to enable, a project. Such resources are not quantified or allocated to a specific project. Institutional support/leverage is communicated to demonstrate Purdue's capacity or capability.
4. **Voluntary uncommitted cost sharing:** institutional support provided by Purdue but not pledged formally in the proposal usually because of agency restrictions against cost sharing. Such cost sharing is subsequently made available to the project upon receipt of the award and is not binding or auditable. Such resources can be internally quantified and solely support a specific project, but they are not normally shared with the sponsor prior to award.

University: General Guidelines

- Handled consistently and in accordance with the Uniform Guidance (2 CFR 200.306),
 - Voluntary committed cost sharing is not expected and cannot be used as a factor during the merit review of applications.
 - It may be considered if it is both in accordance with Federal awarding agency regulations and *specified* in the notice of funding opportunity.
 - Criteria for considering voluntary committed cost sharing and any other program policy factors that may be used to determine who may receive a Federal award *must be explicitly described* in the notice of funding opportunity.
- Mandatory and voluntary committed cost-sharing commitments offered by the University in support of a sponsored project must be:
 - Allowable costs
 - Expended during the award period
 - Quantifiable
 - Auditable
 - Not allocated to more than one sponsored project
 - Treated consistently by the University

27

University: Process

- Starting Point – Understand the Big Picture
 - An initial budget should be established for the total project costs, regardless of funding contributions.
 - Assess whether and/or how cost sharing should be part of the project budget.
- Requests for cost sharing should originate through discussions among the PI(s), their Department Head(s) and Associate Dean(s) for Research.
 - Early in the proposal development process, but no later than **three weeks** before the due date.
 - In accordance with intra-college/school/department processes or procedures.
 - For multi-college proposals, ADRs of **all units** involved must be included in all communications involving inter-college/school cost sharing early in process.
- All cost sharing commitments must be fully documented on University Form 32(s), prepared by Pre-Award, and fully approved by the appropriate University official(s) before being included in the proposal budget.
- Each letter-of-intent, new or renewal submission stands on its own, and cost sharing should be re-evaluated for each resubmission.

28

Office of Research: General Guidelines

- Office of Research staff facilitates the process of developing and coordinating cost sharing requests during the proposal development process. However, department/school/college-level support discussions should be initiated first.
- Cost sharing commitments on the part of colleges, schools, departments, and other units are necessary to show the units' support of the proposed work, and to prioritize requests within the units.
- Central Office of Research cost sharing funds are intended to supplement, not supplant, cost sharing funds provided by colleges, schools, departments, and other units.
- Cost sharing will be considered for all research-focused proposals, and in very special cases, will be considered for proposals that are not research-related. For non-research proposals, the OR team will provide a point of contact for investigators seeking all types of cost sharing and facilitate communication with the appropriate office as possible (i.e., Dean of the Graduate School, Provost, etc.).
- Strategic research areas are given top priority among competing projects.

29

Office of Research: Cost-Sharing Priorities

The following priorities guide the allocation of central cost sharing funds for research proposals:

- Mandatory cost sharing is given top priority. Voluntary cost sharing support will be provided only in exceptional cases. These will be considered under special circumstances considering how the project aligns with the University's strategic goals.
- A mandatory cost sharing requirement **does not ensure** a University contribution.
- Units must prioritize the proposed project through their contribution to the cost share:
 - Typically: 1/3 University and 2/3 provided by PI, Dept(s), and College(s). Contributions of external contributors will be evaluated on a case-by-case basis.
 - High matching requirement: Dept(s) and external contributors provide matching closer to 50% with balance split between the college(s) and Office of Research.

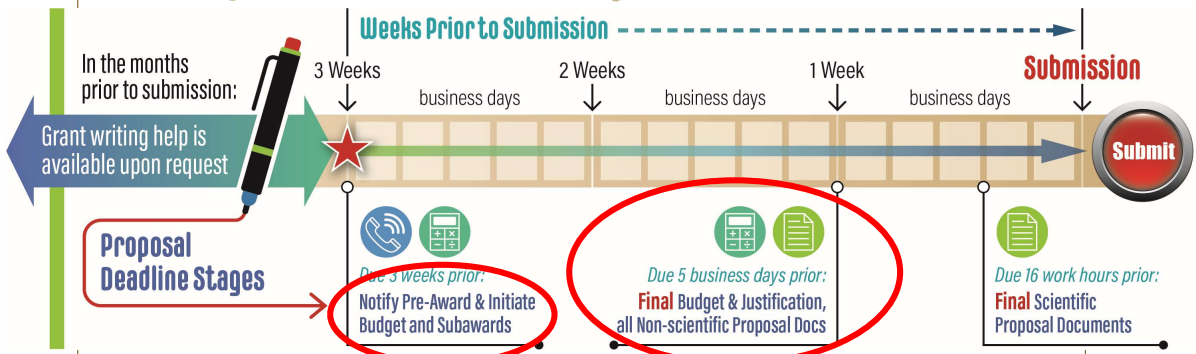

30

Understanding Proposal Budgets

Final Considerations:

- Plan Early – So that you do not get crunched for time.
- Read the Program Announcement (PA, RFP)
 - Read It, Highlight Items, Question, Read It Again
 - Watch for minimum and maximum funding levels
 - Do not guess or deviate from the proposal instructions
- Work with your Pre-Award Specialist

Proposal Deadline Policy

- Anything received after the stated number of days prior to the sponsor deadline or desired submission date will require completion and approval of an exception form in order to be able to submit. Any sponsor deadline after 5:00pm should be considered due at 5:00pm.
- Exceptions should only be requested in extreme circumstances, unanticipated medical or bereavement leaves, or short turn-around time from the initial sponsor notice of funding opportunity.

Understanding Proposal Budgets

Budget Tool: https://www.purdue.edu/business/sps/preaward/budget_tool.html

Budget Tool – For use in drafting budgets only. DO NOT SEND TO SPONSORS.

The purpose of the SPS Pre-Award Budget Tool is to enable principal investigators to develop their own draft budgets within certain criteria (if desired) or to receive a budget created by Pre-Award and be able to make adjustments on their own. The budget developed using this tool is not intended to be sent to a sponsor without Pre-Award review and approval.

Accessing and Using the Budget Tool: The tool may be downloaded from this page and edited within Microsoft Excel. Once an investigator starts to work with a Pre-Award Specialist on revising/validating a budget, it will be encouraged to use the Purdue Box application for sharing and editing the Budget Tool as opposed to downloading and emailing multiple versions.

Current Version (September 2022): The current version of the Budget Tool is limited to a 36-month or less project period. Specific criteria and limitations for use are identified in the below table. Future versions are in development and will be released in the coming months

Budget Criteria	Limitations
<ul style="list-style-type: none"> • 36-month or less project period • Project start date is the 1st of a month • Must be for Organized Research at 55% F&A or Testing Agreements at 38% F&A or 0% F&A (subject to Pre-Award approval) • Can include a limited number of personnel: <ul style="list-style-type: none"> ◦ 5 AY ◦ 5 Calendar Year (FY) ◦ 5 Grads (AY or FY) ◦ 3 Undergraduate Rates (unlimited number at three distinct rates) 	<ul style="list-style-type: none"> • Cannot be used for NIH detailed budgets or NIH with salary cap • Cannot be used for USDA • Cannot include cost share • Cannot include more than 3 subawards • College of Science Graduate Students: This budget tool may not accommodate the AY/summer graduate student payroll actions for College of Science Schools.

Pre-Award Services

Contacting Pre-Award for Help

- E-mail or Phone
 - To Center Address (see handout)
 - To Specific Specialist (see handout – consider availability risk)
- Include as much information as possible
- TIMING - Contact as early as possible (as soon as you even think about doing a proposal). It is never too early! Do not wait until you are ready to submit!

****All of SPS is located remotely. On campus meetings can be arranged in most cases.**
