RESEARCH ARTICLES AND REPORTS

Abstract: "The prevalence of gender wage gaps in academic work is well documented, but patterns of advantage or disadvantage linked to marital, motherhood, and fatherhood statuses have been less explored among college and university faculty. Drawing from a nationally representative sample of faculty in the US, we explore how the combined effects of marriage, children, and gender affect faculty salaries in science, engineering and mathematics (SEM) and non-SEM fields. We examine whether faculty members’ productivity moderates these relationships and whether these effects vary between SEM and non-SEM faculty. Among SEM faculty, we also consider whether placement in specific disciplinary groups affects relationships between gender, marital and parental status, and salary. Our results show stronger support for fatherhood premiums than for consistent motherhood penalties. Although earnings are reduced for women in all fields relative to married fathers, disadvantages for married mothers in SEM disappear when controls for productivity are introduced. In contrast to patterns of motherhood penalties in the labor market overall, single childless women suffer the greatest penalties in pay in both SEM and non-SEM fields. Our results point to complex effects of family statuses on the maintenance of gender wage disparities in SEM and non-SEM disciplines, but married mothers do not emerge as the most disadvantaged group."

RECENT BOOKS

"Presumed Incompetent is a pathbreaking account of the intersecting roles of race, gender, and class in the working lives of women faculty of color. Through personal narratives and qualitative empirical studies, more than 40 authors expose the daunting challenges faced by academic women of color as they navigate the often hostile terrain of higher education, including hiring, promotion, tenure, and relations with students, colleagues, and administrators. The narratives are filled with wit, wisdom, and concrete recommendations, and provide a window into the struggles of professional women in a racially stratified but increasingly multicultural America."
Summary from: http://www.usu.edu/usupress/books/index.cfm?isbn=8695

"The 14 new essays in this collection, from under-represented faculty who teach at predominantly white colleges and universities, discuss both the tenure and promotion experiences of faculty of color and are not racial, ethnic, gender, cultural or discipline specific. The book is thus not only for aspiring graduate students of color and faculty of color desirous of outside mentoring but also for administrators interested in the professional development and dilemmas of faculty of color. Faculty of color describes how they navigated the complex terrain of higher education to achieve tenure or promotion. Most of the contributors are at the associate professor stage of their careers and some hold the rank of full professor."
