

Christie L. Sahley is Associate Dean for Undergraduate Education and Professor of Biological Sciences in the College of Science at Purdue University. As Associate Dean, she oversees undergraduate programs in the College of Science, the College Honors Program and the development of new approaches to the teaching of science. She is co-Chair of the Faculty Committee on Diversity and in that role works with representatives from each of the departments to improve the climate for women and individuals from under-represented groups to facilitate their success. She also mentors female undergraduate students from her home department, Biological Sciences. Dr. Sahley organizes the College of Science female faculty and serves as a mentor to several of the junior faculty. Currently Dr. Sahley is serving as the director of the NSF ADVANCE Purdue Center for Faculty Success.

Professor Sahley has been active as a scholar for more than 25 years. In that time, she has contributed more than 70 articles, reviews, and book chapters to the literature in the areas of the behavioral and cellular analysis of learning and memory. She is currently a Co-PI on the Purdue Woodrow Wilson Fellowship project, STEM Goes Rural, providing leadership for the development and implementation of a MS program to recruit, train, and retain highly qualified STEM graduates as teachers in rural secondary schools.
