Mathematician, educator and inspirational leader, Freeman Hrabowski serves as president of the University of Maryland, Baltimore County — which he has transformed into an academic powerhouse that graduates STEM majors of all races. His research and writings focus on innovating American schools, with special emphasis on minority participation and performance.

As a child in Birmingham, Alabama, he marched in the Children’s Crusade of 1963, a pivotal civil rights campaign.

Among his many honors, in 2012 Hrabowski was named chair of the President’s Advisory Commission on Educational Excellence for African Americans.
