

General Information

Will my data be transferred securely?

Yes, as long as the address in your browser is of the type *https://*. We use the encryption method SSL (Secure Sockets Layer). This protects all data, such as credit card number, bank number, bank account number, name and address so that these cannot be decoded by unauthorized persons when being transferred via the Internet.

What are the requirements for my Internet browser?

To use the *SAP Biller Direct* functions you require a current Internet browser. We recommend Microsoft Internet Explorer 8.0 or higher or Firefox. The Internet browser should meet the following prerequisites:

- 128 Bit SSL is supported
- JavaScript is enabled
- Cookies are activated

What settings do I have to make in my Internet browser?

You have to activate certain browser settings for scripting and cookies in order to ensure that *SAP Biller Direct* is correctly executed. Depending on your browser type, carry out the following procedure:

Internet Explorer (as of version 8.0)

In general, ensure cookies and scripting are enabled, and pop-ups are not blocked for https://*.itap.purdue.edu
