

Economic Impact

(for Fiscal Year 2006-07)

Total Impact on Indiana

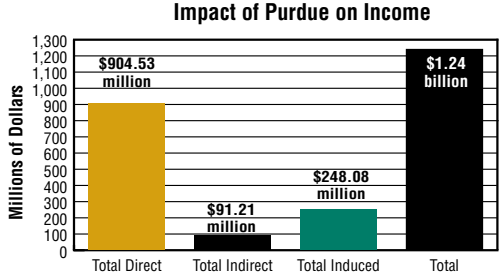

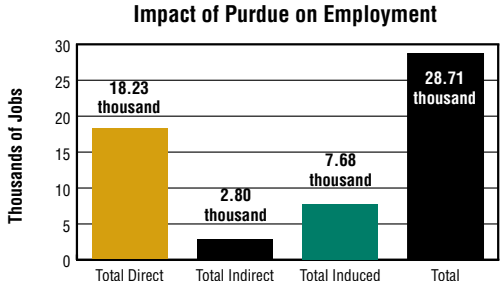

Institutional and student spending generated directly and indirectly more than 47,000 jobs, \$1.86 billion in income, and a total economic output of more than \$3.2 billion in the state of Indiana.

Direct Institutional Impact (Employment and income excluding student spending)

During the 2006-07 fiscal year, Purdue University was responsible for creating a total of 18,230 jobs. In order to support these jobs, Purdue spent \$759 million in salaries and wages on the West Lafayette campus and \$905 million system-wide.

Discovery, engagement, and learning activities at Purdue stimulate 10,476 non-Purdue jobs. The total Purdue and non-Purdue employment and income associated with these activities is 28,706 jobs and more than \$1.3 billion in income.
