OPPORTUNITIES

For Students: Entrepreneurial courses and international programs; interdisciplinary research; access to start-up companies; internship and career possibilities

For Faculty: Interdisciplinary research teams; scientific support to obtain and administer grants; cutting-edge facilities; seed funding; entrepreneurial training and access to investors

For External Partners: World-class research facilities and faculty expertise on materials, processes and products; talented students for internships and jobs; links to K-12 programs; entrepreneurial partnerships through Purdue Research Park

Discovery Park harnesses Purdue University’s world-class research capabilities to tackle global challenges and respond to the local, state, national and global environment. Interdisciplinary research teams work at the frontiers of new science and technology, delivering innovation through business development, industry partnerships and K-12, college and graduate-level learning.

Initiated in 2001 with funding from the Lilly Endowment, Discovery Park now includes eleven-interconnected centers, four buildings, half of Purdue’s faculty and 3000 students.
