

Collaborative Learning

Meeting - Monday, May 8, 2006, MRGN 206, 4:00-5:00p.m.

Present: Karl Smith, A.G.Rudd, Seza Orcun, Willie Burgess

This group is particularly interested in questions such as :

- What can we learn from collaboration?
- Are we really learning from collaboration?
- What is the effect of collaboration on PhD students that are trained using this model?
- Does it impact the way they think or learn?

We discussed the usefulness of an on-line collaboration tool.

The group would like to take a hiatus for the summer and reconvene in the fall. However, they would be interested in electronic communication through the summer.
