

Discussion Session: Remote Instrumentation

Discovery Learning Center Goals	
The focus of the workshop is to form research groups in focused areas to develop funding proposals. Our goal is to bring together people with shared research interests so that they may form collaborations and perhaps generate white papers on emerging and innovative areas of research. We are committed to encouraging and facilitating further meetings of these groups to provide support for seeking external funding.	
General Information	
Facilitator:	<u>Fred Lytle</u>
Number of Participants:	<u>6</u>
Research Areas	
Potential Areas of Research / Key Terms	Adding mass spectrometers to the CASPiE network (Andy Tao)
	Adding database capabilities to the CASPiE network (Scott Brandt)
	Obtaining Cyberinfrastructure funding for the (instrument) network software (John Campbell)
Areas of Common Interest	
	<i>Are there sub-areas of this general topic that are more interesting/relevant? If so, please explain.</i>
	The CASPiE project can be used as a catalyst for obtaining research funding that benefits the project and other faculty
Key Contacts for specialty areas:	
Potential Funding Partners	
	NSF/ NIH

Next Steps: Another meeting? Collecting information?

Individual meetings between CASPiE and potential collaborators

Ideal Outcomes: A proposal? Smaller collaborations? Target deadlines?

Other Notes/Discussion Items

Instrument simulation (Mark Morgan)
