Knocking Out All Murine Genes in Embryonic Stem Cells

Presented by
Richard H. Finnell, Ph.D.
Executive Director and President
Texas Institute for Genomic Medicine

November 10, 2006
11:30 am
MRGN 121

Richard H. Finnell, Ph.D. is the Margaret M. Alkek Professor of Medical Genetics and the Director of the Institute of Biosciences and Technology. Dr. Finnell is also a Regents Professor within the Texas A&M University System Health Science Center and the Executive Director and President of the newly established Texas Institute for Genomic Medicine (TIGM). TIGM owns and operates one of the world’s largest catalogs of embryonic stem (ES) cells for C57BL/6 mice and has contracted access to the world’s largest catalog of genetically modified 129 mouse cells.
