Want to Study Homeland Security?

Managing Resources and Applications for Homeland Security
ASM 59100/OLS 58100/CNIT 58100

Tue & Thu 4:30 – 5:45 pm
ENROLLMENT IS NOW OPEN FOR SPRING 2011

An interdisciplinary practical approach to Homeland Security:

- Homeland security studies
- Risk assessment and management
- Crisis management and communication
- Decision making and team building

Taught by an interdisciplinary team of faculty:

J. E. Dietz, Director of Purdue Homeland Security, former Director of Indiana Department of Homeland Security
W. E. Field, Ag & Bio Engineering
W. A. Foley, Public and Environmental Affairs, IUPUI
P. M. Aaltonen, Public Health Nursing

Students will explore the characteristics of security, personal and corporate perspectives on security, asset identification and cost/benefit analysis, risk assessment and management, crisis decision making, emergency management and response infrastructures, crisis communication, business continuity, best practices, collaborative approaches, and team building. Real-world case studies will be examined, including the attacks of September 11, 2001, Hurricanes Katrina and Ike, the I-35W bridge collapse, and others. Presentations by outside experts in the field of Homeland Security will be included.

Prerequisite:
ASM 59100/OLS 58100/ CNIT 58100 - Foundations in Homeland Security
Senior or graduate-level standing or consent of instructor.

Sponsors:
Purdue Homeland Security Institute (PHSI)
Indiana Dept. of Homeland Security
