Can’t attend at that time? Register anyway and we’ll send you the recording a week after the live event.

About the Speaker: Dr. Kimberly Kinzig, PhD, is an associate professor of Psychological Sciences at Purdue University. She teaches undergraduate and graduate courses in behavioral neuroscience. Her research is aimed at understanding the roles of various neuroendocrine signaling pathways in the control of food intake and regulation of body weight, and how these signals and systems go awry in eating disorders and obesity. She has a PhD in neuroscience from the University of Cincinnati, and did her postdoctoral fellowship at Johns Hopkins University in the Department of Psychiatry and Behavioral Sciences.
