PSY 390 Research Opportunity – Fall 2018

Faculty member or graduate student
Dr. Jeffrey D. Karpicke
Cognition and Learning Lab
http://learninglab.psych.purdue.edu/

Description of research area
The Cognition and Learning Lab conducts basic and applied research on how people learn. Specific areas of interest are as follows:

- Identifying effective learning strategies
- Metacognition and self-regulated learning
- Developing computer-based learning tools
- Memory retrieval processes and retrieval-based learning

Description of undergraduate participation
Students in the Cognition and Learning Lab have the opportunity to get involved in all phases of the research process. Most frequently this consists of running experimental sessions, helping to score and analyze data, and attending periodic lab meetings. Additionally, students have the opportunity (although this is not required) to conduct independent research and learn more about experimental design/computer programming.

Research setting
The Cognition and Learning Lab is located on the 3rd floor of the Psychology Building.

Number of assistants needed
3-4 research assistants are needed.

Contact information
Students interested in doing PSY 390/391/498 in the Cognition and Learning Lab should complete an application using the following link:

http://learninglab.psych.purdue.edu/joinus/psy390/

We will follow up with you shortly after you submit an application. If you have any questions, please direct them to Joey Bedwell: jbedwell@purdue.edu

Additional comments
Students with GPAs of 3.4 and higher are particularly encouraged to apply.
