Faculty member or graduate student
Dr. Brandon Keehn
Attention and Neurodevelopmental Disorders (AtteND) Lab

Description of research area
The primary focus of the AtteND Lab is to investigate attentional strengths and weaknesses in children with autism spectrum disorder (ASD). Our lab uses a variety of tools to study attention in ASD, including behavioral, eye tracking, and neuroimaging methods.

Description of undergraduate participation
Students will participate in all aspects of research, including experiment design as well as data collection and analysis. In particular, students will be involved in coding videos of mother-child interactions of infants at risk for ASD.

Research setting
The AtteND Lab is located on the third floor of Lyles-Porter Hall.

Number of assistants needed
2-4 students

If you are interested in joining our lab, please complete this form and email it to bkeehn@purdue.edu
