Farm Bureau Supper Series  
May 8, 2006  
Ethanol Research at Purdue  
“Agriculture Fueling Your Future”

Agricultural and Biological Engineering  
http://engineering.purdue.edu/abe/  

Laboratory of Renewable Resources Engineering  
http://engineering.purdue.edu/LORRE/

Areas of Active Research

- Converting Indigestible Fiber from DDGS to Ethanol
- Bridge to the Future: Integrating Cellulose Ethanol Technology into Existing Ethanol Facilities
- Biotechnology for Yeast to Convert Sugars from Corn Stover and Switchgrass to Ethanol
- Bio-Mimicking Catalysts for Breaking Down Ag Residues (Corn Stover, etc.) for Ethanol
- Crop Genetics for Easily Processed Corn Stover

Look for the Biofuels (Ethanol and Biodiesel) Display at 2006 Indiana State Fair!
