Alcohol Poisoning

Look for any of these signs:

- **Person is unconscious** or semi-conscious and cannot be awakened.
- **Cold, moist, or pale skin**
- **Slow, shallow breathing**
- **Vomiting while “sleeping”** or passed out, and not waking up after vomiting

How to help:

- **Call 911, then your RA if you're in the halls**
- **Do not leave the person alone. Turn the victim on his/her side** to prevent choking in case of vomiting.
- **Always be “better safe than sorry.”** Don’t let worries about being in trouble or paying the bill stop you from saving a life.

When in doubt:

**Call 911** (or an RA in the halls)
If someone shows any of the following signs:

- vomiting,
- confusion
- has difficulty walking
- slurs words
- unable to visually focus and stay alert
- incoherent

Your friend’s life always comes first!

Other Emergency Numbers:

- Purdue Police  
  (765) 494-8221

- Poison Control Center  
  1-800-222-1222

Wallet cards are available in the Student Wellness Office.
