

Admissions Application PWL

Updated 8/18/10

Description: Some of the tables that are contained in the Admission Application PWL Package are Admissions Application, Admissions Decision, Person Address, Pre Student, Previous Education and Daily Enrollment PU.

Useful for: This package is useful for creating reports regarding Admissions, Previous Education, Recruitment, and Test Scores.

Filters:

Need	Filters
A filter for Student Level is necessary if you are trying to only see Undergraduate or only see Graduate level students.	Example for Undergraduate: [Admission Application].[Admissions Application].[STUDENT_LEVEL] IN ('UG')
Particularly at the undergraduate level you will want to filter on the application population of choice (e.g. B, SB for beginners, T, ST for transfers)	[Admission Application].[Admissions Application].[ADMISSIONS_POPULATION] in ('B', 'SB')
Latest decision allows for filtering on students who are admitted versus applied, the following filters captures all admitted students (admits who are canceled are AC and CM)	[Admission Application].[Admissions Application].[LATEST_DECISION]in ('A', 'AA', 'AC', 'AN', 'AP', 'AR', 'O1', 'O2', 'O3', 'OP', 'OT', 'CM', 'OR', 'OS')
Admitted Undergraduate Students who have Accepted their offer of Admission	[Admission Application].[Admissions Application].[LATEST_DECISION]in ('A', 'AA')
SAT/ACT scores	[Admission Application].[Test Slot].[TEST_RULE] = 'SATACT'
CORE GPA Information	[Admission Application].[Secondary School Subject].[SUBJECT] = 'CORE'
To insure you get only one row per student, use this filter. Although with the change in admissions processing beginning with the fall 2010 semester, this filter is not essential post 2010	[Admission Application].[Admissions Application].[CURRICULUM_PRIORITY_NUMBER] = '1'

Key Variables:

Daily Enrollment PU are students who are officially registered which automatically includes students with “RE” or “RW” Registration Status.

Validated Reports:

Note: Adding information to any list report (high school, email, test scores, etc.) requires filters that potentially eliminates students from the report. The base report that will provide a school with all of their currently admitted students is Admissions Fall Current Admit Address Pull. The list reports tied to admissions are removed from validated reports from the beginning of August until the official release of admissions decisions around December 15th each year.
