

FRZ Student PWL

Created 6/9/10

Description: Some of the tables that are contained in the FRZ Student PWL Package are FRZ_PERSON_STUDENT, FRZ_STUDENT_COURSE, FRZ_ACADEMIC_STUDY, FRZ_ACADEMIC_OUTCOME, FRZ_ADMISSIONS_APPLICATION, FRZ_ENROLLMENT_PU, FRZ_GPA_BY_LEVEL, FRZ_GPA_BY_TERM, FRZ_PREVIOUS_EDUCATION, and FRZ_TEST_SLOT.

Useful for: This package is useful for creating reports using frozen data regarding detailed information on Students, Enrollment, Academic Outcome, Academic Study, GPA, and Student Course.

Filters:

Need	Filters
If you are using FRZ Admissions Application table, you need to use this filter to only return one line per student.	[Freeze Student]].[FRZ_ADMISSIONS_APPLICATION].[CURRICULUM_PRIORITY_NUMBER] = '1'
You must identify the Freeze Event when you are using Frozen data. An example of filter listed here, but freeze event descriptions are outlined in a document on student reporting website referenced below.	Example: [Freeze Student].[FRZ_ADMISSIONS_APPLICATION].[FREEZE_EVENT] = 'CENSUS'
If you want to see Awarded Degrees, you need two filters. One for Freeze Event and the other for Academic Outcome of Awarded.	[Freeze Student].[FRZ_ACADEMIC_OUTCOME].[STATUS] = 'AW' and [Freeze Student].[FRZ_ACADEMIC_OUTCOME].[FREEZE_EVENT] = 'TERM_END'
If using TEST_SLOT, you need to indicate test slot rule name.	Example: [Freeze Student].[FRZ_TEST_SLOT].[TEST_RULE] = 'UGADMS'
GPA by Term	[Freeze Student].[FRZ_GPA_BY_TERM].[GPA_TYPE] = 'T'
GPA Overall – in most cases	[Freeze Student].[FRZ_GPA_BY_LEVEL].[GPA_TYPE] = 'O'
GPA Overall – if needing transfer hours included	[Freeze Student].[FRZ_GPA_BY_LEVEL].[GPA_TYPE] in ('O', 'T')
If you are looking for courses with grades, you need to use this filter.	[Freeze Student].[FRZ_STUDENT_COURSE].[GRADABLE_IND] = 'Y'

Key Variables:

For all tables except FRZ_Admissions_Application a Student is in the FRZ Student package if a Student Record is created for them (SPAIDEN) in Banner before the FRZ event occurs. Once the student has an AA status (Accepted Applicant), then a student record is generated in Banner. A student exists in FRZ_Admissions_Application for any academic period in which they apply, but if you combine results from admissions application with any other table in the FRZ_Student package you will be limited to only those students with a SPAIDEN record.
All data items in FRZ Student are tied to the Academic Period in which they were frozen.
FRZ Previous Education shows all Previous institution information for the academic period the data was frozen in, both high school and college.

Student Classification BOAP has the most recent registration activity.
FRZ Enrollment PU are students who are considered officially enrolled at the time of CENSUS this includes students with “RE” or “RW” Registration Status in FRZ_Student_Course at the time of the CENSUS freeze event.
