

**APPROVED**  
 July 10, 2008 by the OnePurdue  
 Oversight Executive Committee

**DEFINITION**

The term "system" in this diagram is inclusive of computers and networks, application software, people, data and reports, and business processes needed to support the institution.

**RESPONSIBILITIES**

ITEA will implement appropriate Project Management Offices (PMOs) with cross functional and technical representation to monitor and manage the execution of established priorities. PMOs are operational, not governance.

These steering committees would establish operational priorities in response to strategic priorities.

These are community interest groups that provide input as to what's working, what's not, and what's needed. They do not prioritize requests.

This group would meet regularly to coordinate data and processes between separate implementations of Banner to ensure that we have integrated, consistent summary level data for the Purdue system across all four campuses and the statewide programs.

**MEMBERSHIP**

These committees will be chartered by their respective organizations and include appropriate department heads and technical representatives, and appropriate cross committee and cross campus representatives

These committees will be chartered by their respective organizations and include representation from various constituencies inclusive of regional campuses.

This committee will be chartered by the Student Services steering committee and include representatives from all regional campuses and a representative from statewide programs.

The need for this group is driven by the separate implementations of the Banner student system on the campuses
