

## Commissioning

Page 1 of 1

Last Update: July 1, 2005

### Checklists:

Most of the projects at Purdue do not include a full commissioning program. Even when you are involved with a relatively small project there are some areas of construction we require at least a modified commissioning section. These are:

- Hoods
- Motors
- Air handling units

For these three areas we have developed contractor checklists that are to be included in the specifications. You will find all three of these checklists in Commissioning folder of this Handbook.
