Dr. Ejeta is the 2009 World Food Prize Laureate and Distinguished Professor of Agronomy at Purdue University. He joined the Purdue staff in January 1984.

Dr. Ejeta's research areas include: Elucidate mechanisms of resistance to drought, Striga, and plant diseases in sorghum; study inheritance of traits associated with resistance to these traits; characterize genomic differences among botanical races and germplasm pools of sorghum; development and enhancement of sorghum germplasm with increased levels of resistance to drought, Striga, and grain mold infection.
