

With the on going pandemic of COVID-19, many people's life has been influenced. Including the students of Purdue. The crisis has seriously changed the way that classes are taught and how people socialize.

First, personally my classes have been affected by COVID19 a lot, since we had to move everything online. With everything on the web, it is very easy to get distracted while working on your school work, this create problems for me since sometimes I would forget some of my works and submit them late. Academic concerns are not the only thing that affects my life. Facing your computer all day long has been a challenge for us too, since now we have to face our computer screen for over 12 hours a day. For purposes such as school work, social media or even exercising.

It has also been a hard time for us to socialize, since a state wide ban of travel has been published and it might be safe to visit our friend in a time like this. Many of us would face the problems that we had to socialize with other people by the use of electronic devices. This may seem good in the first place, but it stresses many students out due to the limitation of telecommunicating. It also brings health concerns for some individuals due to sitting in front of their table all day long.

Third, our community has been severely affected as well, since most of the people we know I Purdue are students. Due to this epidemic, many of them has returned to their hometown. International students would even spend tens of thousands of dollars to buy plane tickets just for the sake of going home. Some new student would even face problems with attending the next semester due to travel bans.

I believe the epidemic has affect everyone's life, disregarding their nationality, ethnicity or location. But I have confident that by the cooperative effort of the governments and its people, we should be able to get over this and restore the world to its former glory.
