Purdue University Authorized Artificial Intelligence (AI) Tools and Integrations

Published by Purdue Systems Security - November 9, 2026

Public Data Only Tools - Common University AI tools are listed below. Other University tools not listed are still authorized for public data use only.

Enterprise Tools

Tool Name	*Description*	*Use case*	*Primary Use (can be Multiple)*
OpenAI (ChatGPT, DALL-E, SORA)	Prompt based generative AI chatbot	AI assistant chatbot for general knowledge prompts	Enterprise
Microsoft Azure OpenAI	Prompt based generative AI via RCAC-controlled Azure environment	AI assistant chatbot for general knowledge prompts	Enterprise
x.ai (Grok)	Prompt based generative AI chatbot	AI assistant chatbot for general knowledge prompts	Enterprise
MidJourney	Prompt-based image and video generation	AI assistant for images and video	Enterprise

Unique Use Cases

Tool Name	*Description*	*Use case*	
Dovetail (Free Tier)	AI powered market research and customer feedback transcription	General market research inquiries not associated with Purdue Research	Administrative
Misty	AI powered robotics teaching tool	Companion software to the Misty Robot	Teaching and Learning
Stellia.ai	AI generated training programs and documents	Generating training materials	Enterprise
StarRez AI	Communications Editor	Writing Assistant	Administrative
Scite	AI-powered research article search	Scientific/Research Literature Review	Research
Abnormal AI	AI-powered behavior detection security tool	IT Security	Administrative
Lychee Slicer	AI-powered 3d modeling	Generating sliced 3d models	Teaching and Learning
Coevera Pipeliner	AI-powered CRM Software	AI-powered B2B CRM tool	Enterprise
ServiceNow AI	AI tools within ServiceNow Enterprise/IT Management System	Specifically approved for use in certain Purdue courses	Teaching and Learning

Modules within already used Software

Software	*Tool*	*Use Case*	
Adobe Creative Suite	Firefly, Adobe Acrobat Assistant, etc.	Image Generation, Document Summarizing, etc.	Enterprise

Sensitive and Public Data Tools - Only AI tools listed below are authorized for sensitive data use.

Enterprise Tools

Tool Name	*Description*	*Use case*	
GenAI Studio	Web access to multiple open-source AI models, running locally on Purdue hardware. Available models include LLaMA, Mistral, DeepSeek, etc.	Multiple, from administrative to research. Configured to accept Sensitive Data, excluding FERPA.	Enterprise
MS Copilot with Data Protection *	Corporate data protection for Copilot	Public to Sensitive: Data found within the Purdue Microsoft 365 tenant may be utilized with the Copilot instance within the Purdue Microsoft 365 tenant.	Enterprise
GitHub Copilot (on-prem version - contact RCAC)	AI coding assistant	AI Assistant for coding	Enterprise
JetBrains IDE	AI-assisted Integrated Development Environment (IDE)	Software Development	Enterprise
Google Gemini (Flash, Veo, NanoBanana, etc.)	Prompt based generative AI chatbot and Media Generators	AI chatbot for general knowledge prompts and media creation	Enterprise
Google Gemini Notebook (formerly Notebook LM)	AI powered document analysis and summation	Summarizing documents, creating audio summaries of documents	Teaching and Learning
Google Gemini Enterprise Agent Platform (formerly Agentspace, Vertex)	AI Agent Creation and Orchestration	Building and Deploying AI Agents	Enterprise
Google Antigravity (Enterprise version only)	AI-assisted code IDE and code generation	Coding, software development	Enterprise
Anthropic (Claude, Haiku, Sonnet, etc.)	Prompt based generative AI chatbot and code assistant	AI assistant chatbot for general knowledge prompts	Enterprise
Anthropic (Claude CoWork, Claude Code)	AI-assisted projects and code generation	AI Assistant for coding and projects	Enterprise
OpenAI (via API Access)	API access to OpenAI Models	AI chatbot for general knowledge prompts and media creation	Enterprise

Unique Use Cases

Tool Name	*Description*	*Use case*	
iSeek.ai	Decision-making analytics	Public: Publicly available information on courses Sensitive: Course curricula and materials (Blackboard)	Teaching and Learning
Proofig	Scientific image fraud detection	Public to Sensitive: Research Papers and Associated Data	Teaching and Learning, Research
Modality	Facial and Speech tracking system	Assists with diagnosing neurological conditions	Research
Rival HR	AI-powered employee recruiting	Assists with employee recruiting	Administrative
YuJa Panorama	AI-powered LMS Accessibility Tool	Enables accessible content in LMS (e.g. Brightspace)	Teaching and Learning
Zoomi	AI-powered education personalization	Adapting course materials for different learners	Teaching and Learning

Modules within already used Software

Software	*Tool*	*Use Case*	
Joule	SuccessFactors	AI self-help assistant within SAP SuccessFactors	Enterprise
Teams AI Assistant (not MS CoPilot)	MS Teams	Live meeting transcription	Enterprise
Convai	AI Avatar Creation and Interactions	Creating Avatars for AI Interaction	Teaching and Learning, Research
Panorama	Brightspace Integration enabling accessibility features for web documents	Acessibility Aid	Teaching and Learning

Restricted, Sensitive, and Public Data Tools -** Only AI tools listed below are authorized for restricted data use.

Enterprise Tools

Tool Name	*Description*	*Use case*	
IvyAI (Ivy.ai)	Enterprise chatbot	Self-help chatbot (IT self-service, Bursar Self-service)	Administrative
Ocelot	Student info management program with AI chatbot at PNW	Public: Some publicly accessible personal contact data for students, personnel, alumni, donors, business partners, or members of the public Sensitive: Purdue University Identification Numbers (PUID) Restricted (Excluding HIPAA): Student Educational Records, Data regarding student financial aid and/or employee loans	Administrative
Gradescope	Automated grading software	FERPA (grades)	Teaching and Learning
Variate	Automated question generation	FERPA (grades)	Teaching and Learning
iClicker	Automated question generation	FERPA (student performance data)	Teaching and Learning
Circuit (formerly known as Charlie)	Student peer review facilitation	FERPA (student performance data)	Teaching and Learning
TurnItIn	AI Tool: iThenticate	FERPA (plagiarism detection)	Teaching and Learning

NVivo	Qualitative research analysis and language parsing	Analyzing survey responses and written human subjects data	Research
TurboScribe	AI powered transcription	Transcribing video and audio files	Research, Teaching and Learning
Alice.ai	AI powered recording and transcription	Creating and transcribing audio files	Research, Teaching and Learning
CopyLeaks	AI Text and Image Detection	Detecting AI Usage in Documents	Teaching and Learning
Zoom AI Assistant	Zoom	Live transcription, video enhancing tools, meeting assistant	Enterprise
Catalyst LabFlow	AI-powered laboratory procedure training	Preparing students for labwork	Teaching and Learning
Watermark Insights	AI-powered specialized ERM for educational instutions	ERM for Colleges and Universities	Enterprise
SimCare FieldX	Tracks and manages field experiences for Counseling grad students	Time/Performance Management	Teaching and Learning

Unique Use Cases

Tool Name	*Description*	*Use case*	
Dovetail (Enterprise)	AI powered market research and customer feedback transcription	Public: General market research inquiries not associated with Purdue research Sensitive: De-identified general market research inquiries associated with Purdue research Restricted (Excludes HIPAA): de-identified human research subject data inquiries associated with Purdue research	Administrative, Research
Microsoft CoPilot Studio	AI Agent creation and integration platform	Building AI agents or integrating 3rd-party AI agents into workflows	Administrative, Research
Box.com AI ***	Box.com	Applying AI agents to content hosted within Box.com	Administrative, Research
OpenEvidence (de-identified patient data ONLY)	AI powered medical dictionary	Idea generation for medical diagnoses	Administrative, Research
Stukent	Simulated Internship System	AI-powered internship simulation within an LMS	Teaching and Learning

Modules within already used Software

Software	*Tool*	*Use case*	
TDX	Genesys (call center uses AI integration with TDX)	Public: Some publicly accessible personal contact data for students, personnel, alumni, donors, business partners, or members of the public Sensitive: Personal contact data for students, personnel, alumni, donors, business partners, or members of the public Purdue University Identification Numbers (PUID), Computer User Names and Passwords Restricted (Excludes HIPAA):	Administrative

Notes

* Output must be assigned an appropriate sensitivity label and stored in appropriate location
** HIPAA information requires special consultation with Purdue IT before any new use with AI tools
***All use cases for this service must be reported to Purdue IT

Primary Use may include *Enterprise* , *Teaching and Learning* , *Research, or Administrative*

When using an AI tool with Sensitive or Restricted data, the tool MUST be accessed via Purdue SSO or an equivalent
The Models/Systems from OpenAI, Microsoft, Google and Anthropic require an Enterprise or API-level license to gain the necessary legal protections for Sensitive or Restricted data. Contact Purdue IT for details.
The Models/Systems for Grok and MidJourney have not been vetted by Purdue IT
