Start by writing down your exam information so you know what to prepare for:

## Step \#2: Divide Material

Next, you should divide the material you need to study into 4 equal parts: A, B, C, \& D. (Part A should be the oldest material and Part D should be the most recent material covered).

Example: If your exam covers Chapter 1-8 of your Biology Textbook, you can divide them as follows: A=Chapters 1-2, $\mathrm{B}=$ Chapters $3-4, \mathrm{C}=$ Chapters $5-6$, and $\mathrm{D}=$ Chapters 7-8.

A: $\qquad$
B: $\qquad$
C: $\qquad$
D: $\qquad$

After you divide the material identify what you should focus your time on. As you sort information into three categories, start to consider what strategies you will use to review the information.
