BECHTEL INNOVATION
DESIGN CENTER

ADVANCED PROTOTYPING FOR STUDENTS
The Bechtel Innovation Design Center (BIDC) was inspired by students who asked for an advanced prototyping facility (Makerspace) where they could come together to design and build solutions to real-world problems.

We support students from across Purdue as they pursue class related, entrepreneurial, societal, team, and personal projects.

No previous knowledge is needed to access the center - only a willingness to learn and work safely.

Use of the BIDC does not change any IP ownership of your work.
