This will take you to all of the projects for that specific Co-PI. At that point you can look at their individual projects:

Click on the RED arrow on the right of their listed project.

This brings up a list of employees that are paid on this project. Here the Co-PI needs to record the **effort loss** for that person and the **primary reason for the loss**. If the effort loss is the same for each person, the Co-PI can click on all the employees and it will apply to all of them once you hit submit.

If you need to sort your Co-PIs by department, there is a search field on the right hand side.
