Support Circle

The Susan Bulkeley Butler Center for Leadership Excellence established the Support Circle as a care network in August 2020. The Support Circle provides an informal and flexible space to mitigate stress. In an update after a year, the Women's Global Health Institute (WGHI) will be a partner in organizing the Support Circle. The Butler Center will remain the lead and WGHI will be an equal collaborator starting August 2021. This joint effort will promote a culture of care on campus, make wellness a key area of focus, and thus cultivate a space for faculty to share and discuss aspects about their well-being, as well as make group and mutual mentoring possible.

butlercenter@purdue.edu

The Support Circle:

- Creates an informal space on campus for individuals to raise and discuss what is on their mind.
- Offers a peer support circle of faculty colleagues who will listen to and talk with faculty (ALL instructors) about their concerns.
- Provides resources and information on ways to address concerns.
- Advocates for change and support on campus for identified areas of concern related to harm, accountability, and healing.

Monthly drop-in session details are available in the semester schedule.
