The Purdue University Institute for Cancer Research and Indiana University Melvin and Bren Simon Comprehensive Cancer Center are pleased to announce an online course on “Big Data Training for Cancer Research” (BigCare) funded by NCI. This online self-paced course will help cancer researchers develop skills for managing, visualizing, analyzing, and integrating various types of omics data in cancer studies. The course is open to cancer researchers, including oncologists, faculty, postdoctoral researchers, and graduate students. Individuals from underrepresented groups are especially encouraged to apply.

There is no cost for this course. Please check our website for course details and application instructions (https://www.purdue.edu/bigcare). We are hosting this course for only a limited time, so please apply as early as possible.
