

# COLLABORATION **EXPRESS**

Collaboration Express is an initiative from Purdue University that aims to accelerate Indiana's capacity for attracting and expanding high-technology job opportunities among new ventures as well as second-stage (and larger) employers.

## FOR COMPANIES

**Need help to grow your business?**

**Need help to enhance business efficiencies?**

**Need help finding interns?**

**Collaboration Express serves as a portal by which companies can:**

- streamline business processes and improve competitiveness/profitability (Purdue TAP)
- recruit interns and staff (Interns for Indiana, CCO, Purdue Co-ops, Fullfillment Centers)
- license groundbreaking, advanced technologies (Office of Technology Commercialization)
- find space and resources (Purdue Research Park)
- connect with experienced Purdue alumni (Purdue Foundry)

Additionally, if your company is in its "second-stage" — about 10 to 99 employees and/or \$750,000 to \$10 million in revenue — it may be eligible to receive assistance through Purdue's **Economic Gardening** initiative. Economic Gardening focuses on (1) core business strategy, (2) market intelligence, (3) qualified leads, (4) and leadership and management team development.
