

Sara C. Pryor, Professor, Department of Earth and Atmospheric Sciences, Cornell University.
Website; <http://www.geo.cornell.edu/eas/PeoplePlaces/Faculty/spryor/>

Bio: Professor Pryor is a fellow of the American Association for the Advancement of Science, is author of over 170 journal articles, editor of two books and has served in multiple capacities for organizations such as the Intergovernmental Panel on Climate Change and the US National Climate Assessment. Professor Pryor's research team focusses on multi-scale high-fidelity modeling and experimental approaches to improved understanding of reciprocal coupling at the energy-water-land nexus. Her research also incorporates land-based and space-based remote sensing and addresses key hypotheses related to regional climate variability and change and particularly how this impacts large-scale (high-value) infrastructure.
