POWER AND ENERGY RESEARCH OPPORTUNITIES FOR VETERANS

HIRING NOW!!

This exciting research opportunity for STEM majors interested in energy research is unique in that it can be designed to fit your professional goals and availability. This means there is flexibility between hourly rate, credit hours, and/or earned academic/research credits…and we'll work with you to develop a game plan that is specific to you! Through it all, you will be paid a competitive wage…and concurrently gain valuable experience in a career field that is hiring college graduates with these skills!
