

Research Support Services

The mission of the Center for the Environment is to converge, catalyze, support, and promote proactive inter- and multi-disciplinary research that addresses important environmental challenges.

We do this by working with individuals and teams of all sizes throughout the research process.

The Center for the Environment offers research development services to our Faculty Affiliates including:

Research conceptualization

- Identify and communicate potential funding sources for environmental projects;
- Brainstorm project ideas at early stages;
- Organize campus meetings, workshops, or seminars to connect affiliates and stimulate interest in research projects;
- Assist in identifying internal and external stakeholders.

Project development

- Work through requirements, opportunities, and challenges of identified calls for proposals;
- Review and discuss pre-proposals, outlines, or project summaries;
- Identify and reach out to potential partners for activities, support, or creation of an advisory board;
- Help teams navigate the proposal development and submission processes.

Project implementation and promotion

- Provide help for planning and coordinating team meetings and events;
- Promote project progress and results through C4E communication outlets;
- Monitor funding landscape for future opportunities.
