

*Mike Tzamaloukas, Ph.D.  
Founder, Dir. of Engineering*

# Integration Pains

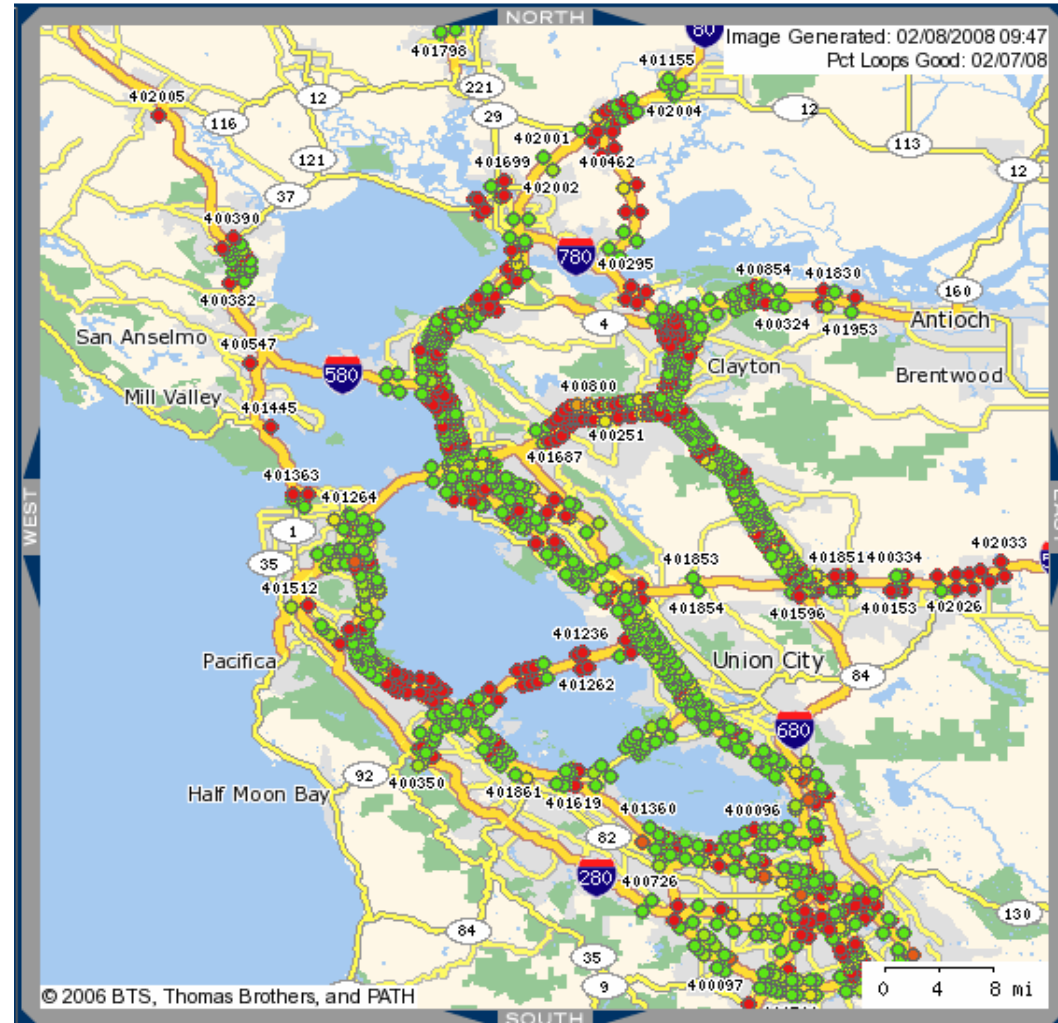

- Data format standards
  - Plenty
- Equipment interoperability
  - Scarce
- Agency coordination
  - Sometimes

# Infrastructure Pains

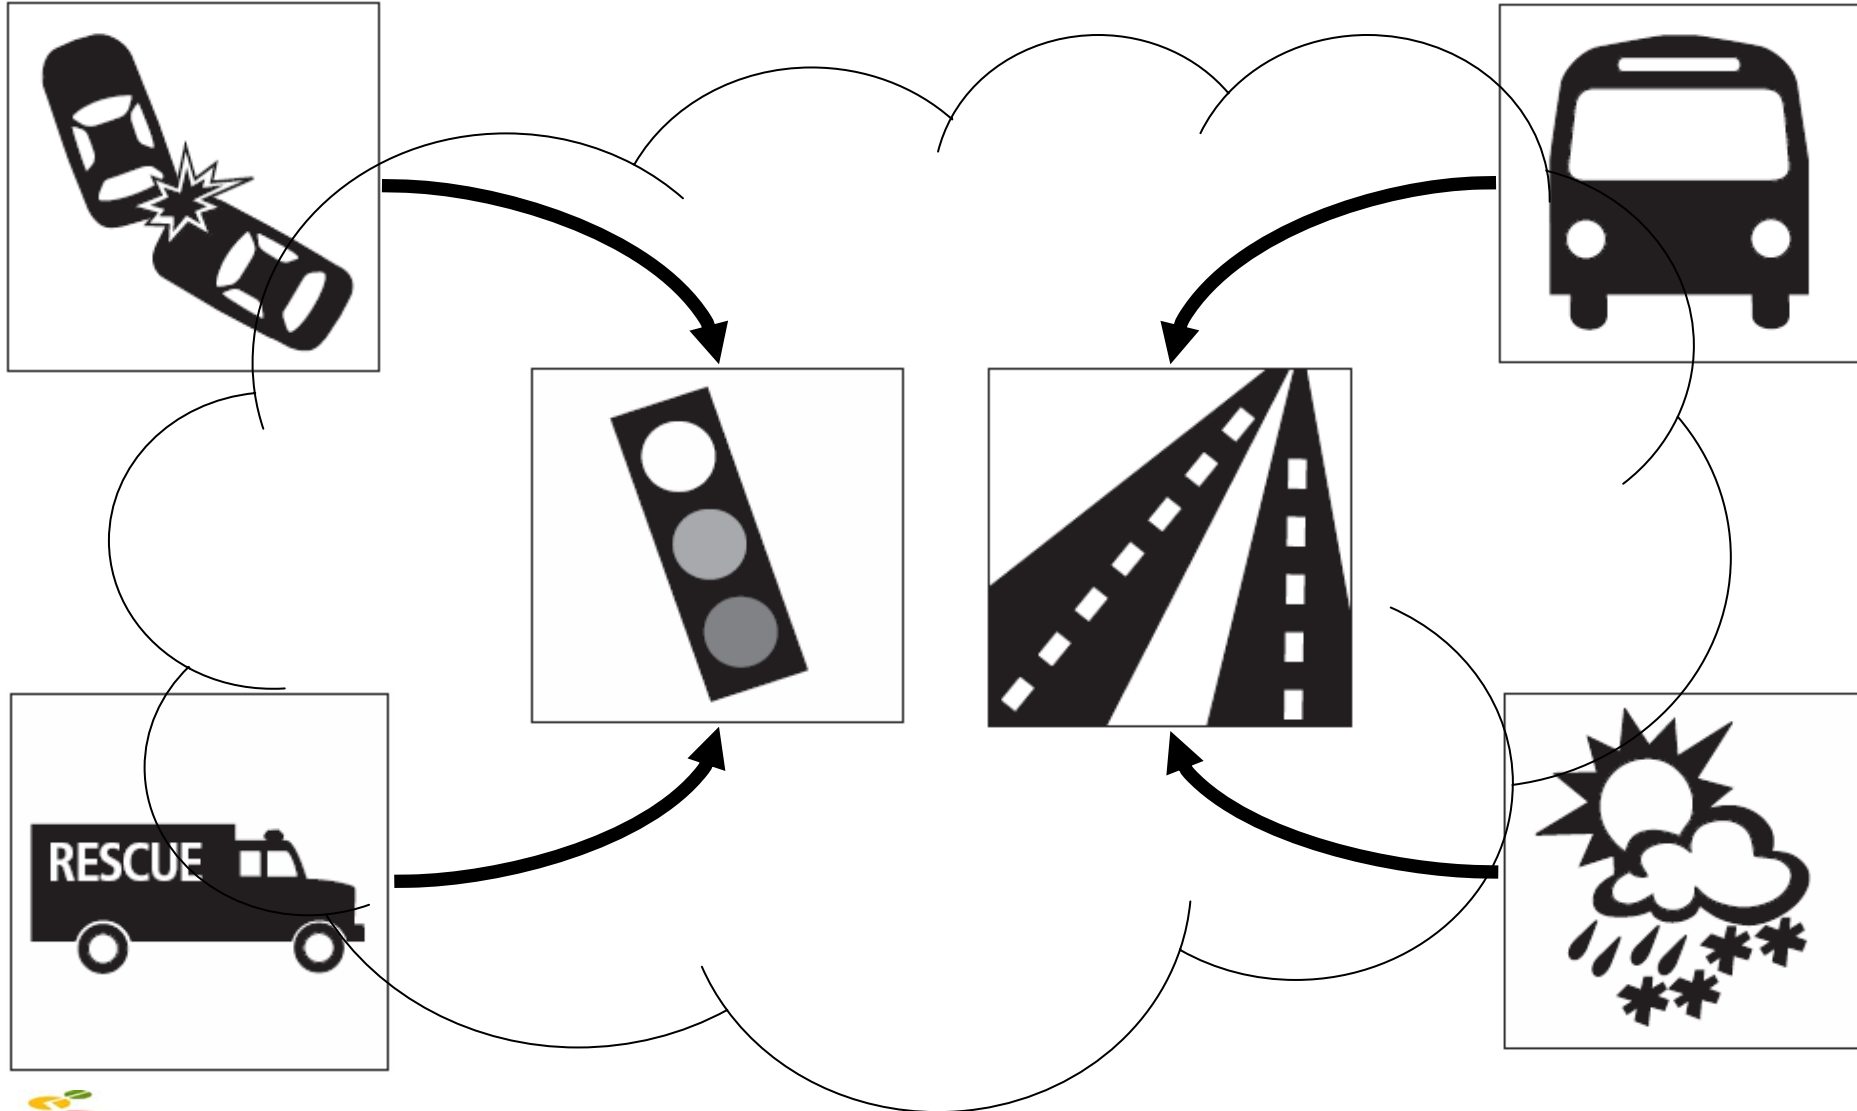

- Limited coverage
- High failures rates
- Astronomical costs
- Stagnant growth

What can alleviate traffic congestion,  
save lives and make infrastructure  
planning cost effective ?

***Connectivity***

# The Probe Revolution

# Traffic – Killer Application

- Productivity benefits
- Improved quality of life

# The Road Ahead

- The private sector will pave the way
- The public sector needs to embrace and vehemently support imminent change
- Universities need to work closer with the private sector and become more “applied”
