3—Adverse Winter Weather Procedures and Announcements
4—Adverse Weather Planning Considerations Checklist
Section 1: Plan Fundamentals

1.1 Purpose:

A) The Adverse Weather Plan provides general guidance, organizational structure and specific direction on preparedness, response and communication disciplines for severe weather emergencies. It is critical that we are prepared for potential events to protect the Purdue “family” and local community residents. The plan also provides basic procedures, resources, and guidance in preventing, preparing, and responding to severe weather events.

B) The plan identifies departments and individuals that are directly responsible and accountable for emergency response and critical support services. It also provides a structure for coordinating and deploying essential resources.

C) At Purdue University, planning ahead for emergencies is part of normal business and campus life, and all members of the campus community share a responsibility for preparedness. An emergency can strike anytime or anywhere and may affect everyone.

1.2 Scope:

A) The resources and strategies outlined in this plan are designed to give assistance to students, faculty and staff at the Purdue University West Lafayette campus.

1.3 Laws and Authorities:

A) Public Law:
   2) Federal Civil Defense Act of 1950, as amended Public Law 920-81st Congress (50 USC App. 2251-2297)
   3) Disaster Relief Act of 1974: Public law 93-288
   4) Emergency Planning and Community Right to Know Act (EPCRA)
   5) Robert T. Stafford Disaster Relief and Emergency Assistance Act, PL 106-390, as amended (USC Title 42, The Public Health and Welfare Chapter 68, Disaster Relief), 2000
   7) The Higher Education Opportunity Act (Public Law 110-315) (HEOA) was enacted on August 14, 2008, and reauthorizes the Higher Education Act of 1965, as amended (HEA).

B) Indiana Statutes:
   1) IC 10-14-2, Chapter 2, Emergency Related Duties of Department of Homeland Security
2) IC 10-14-4, Chapter 4, State Disaster Relief Fund
3) IC 10-14-5, Chapter 5, Emergency Management Assistance Compact
4) IC 10-14-6, Chapter 6, Interstate Emergency Management and Disaster Compact

C) University Executive Memoranda:

### 1.4 Situation Overview – West Lafayette Campus

A) Purdue University is located in West Lafayette, IN (Tippecanoe County). According to the current Census, the population of Tippecanoe County is over 167,900 people...highest concentration live in West Lafayette/Lafayette cities, including Purdue’s campus.

B) Purdue’s system-wide enrollment is over 70,000 students; however, this plan is designed for the West Lafayette campus which has an enrollment of 38,788 students (2013-14) from 50 states and over 126 countries (nearly 25% of whom are international students).

C) There are 15,697 faculty and staff members at the West Lafayette campus.

D) The West Lafayette campus is a “community” of over 50,000 faculty, staff, and students.

### 1.5 Planning Assumptions:

A) A severe weather event could strike at any time of year.

B) Severe weather event may require cooperation/coordination of internal and external departments, organizations, and agencies to include, university, city, county, state, and federal entities.

C) Local, state, and federal services may not be available.

D) Basic services, including electricity, water, natural gas, heat, telecommunications, and other information systems may be interrupted.

E) Buildings and other structures may be damaged.

F) Normal suppliers may not be able to deliver goods.

G) Students, faculty and staff may not be able to travel to or leave the University.
Section 2: Concept of Operations

2.1 Introduction

A) The Adverse Weather Plan is designed to incorporate all areas of comprehensive emergency management—mitigation/prevention, preparedness, response, and recovery. The plan is flexible in that part of the plan or the entire plan may be activated based on the specific emergency and decision by University senior leadership.

B) The Director, Campus Emergency Preparedness and Planning, will spearhead the development, coordination, and revision of the plan.

2.2 Objectives

A) The plan’s critical objectives are:
   1) Preservation of life.
   2) Protection of the university’s physical assets
   3) Return to normal academic and business operations.

B) Additional objectives:
   1) Provide strong leadership and effective management.
   2) Ensure a quick response to a severe weather event.
   3) Implement the National Incident Command System (NIMS).
      (i) Require all applicable personnel be trained on NIMS requirements.
   4) Develop and maintain mutual aid agreements with local agencies, as needed.
   5) Partner with local, state, and federal agencies and appropriate private sector organizations.
   6) Develop and implement an effective communications process for internal and external stakeholders.
   7) Educate stakeholders on prevention and preparedness recommendations, as applicable.
   8) Periodically, exercise the plan to ensure its effectiveness and change as needed.

2.3 Plan Operation

A) The Senior Director of Environmental Health and Public Safety (or representative will reference the plan to prepare the campus for severe weather (see attachments 2 & 3) or when severe weather event that significantly impacts the University. The Senior Director or representative also serves as the Emergency Operations Center (EOC) Director)
B) The plan may be referenced after consultation with external partners to include National Weather Service, Tippecanoe County Emergency Management Agency and Indiana Department of Homeland Security. Plan considerations:
   (i) Activate the EOC, as needed.
   (ii) Work with M & M personnel to activate their Crisis Communication Plan when needed and release information on possible & actual significant severe weather events. (See Section 5.0)
   (iii) Maintain frequent communication and coordination with key local and state partners (e.g., Red Cross, Tippecanoe County Emergency Management Agency, District 4 Planning Council, etc.)
   (iv) Provide regular updates to Purdue Executive Leader Policy Group (ELPG).
      (a) Provide operational recommendations to ELPG.

2.4 Emergency Operations Center (EOC)

A) The purpose of the EOC is to serve as the single focal point and command center for the management of information, decision-making, and resource support and allocation in an emergency and recovery process and sharing of this information with the University President, or designee. The primary functions of the EOC are to:
   1) Provide support to the emergency site Incident Commander.
   2) Advise with the ELPG and/or determine policy directions as needed.
   3) Provide resources needed by the campus.
   4) Provide direction and support to Incident Command.
   5) Provide “one voice” in communicating emergency information to the public (normally, Marketing & Media personnel fill this role, or the external support company, FEI will assist).

B) EOC Activation: When a severe weather emergency occurs, the Senior Director Environmental Health & Public Safety, or representative, will determine if the EOC is to be activated and, if activated, which positions will be staffed for the emergency response. Refer to the EOC Handbook (IEMP attachment 5) for specific procedures.
Section 3: Assignment of Responsibilities

3.1 Emergency Preparedness Office

A) Emergency Preparedness Office (EP) personnel will monitor the weather throughout the year and provide the Senior Director, and others, periodic updates.

B) EP Office personnel will send out a weekly email (normally on Monday) that provides key individuals the “Major Events” list and a weather forecast for the week. (See attachment 1).
   1) The Major Events list is designed to capture information primarily on large outdoor events. The list provides key personnel with situational awareness of events that may be impacted by severe weather.
      (i) EP personnel will send out email updates, as necessary due to incoming severe weather.

C) During Indiana Severe Weather Preparedness Week, EP personnel will conduct a “Voluntary Tornado Warning Drill” for the entire campus.

D) The EP Office supports Purdue’s educational mission through its engaged and sustainable partnership with the Purdue University Meteorological Association (PUMA) under the direct supervision of Dr. Mike Baldwin.
   1) This partnership has resulted in our increased weather forecasting accuracy and contingency planning while allowing the students a real-world application of their skills.
      (i) Examples of this partnership in action include:
         (a) Inclusion of highly accurate localized weather forecasts for Event Action Plans
         (b) Risk and Impact analysis of weather threats
         (c) Real-time severe weather monitoring during incidents and planned events
         (d) Weather education and threat briefings

3.2 Senior Director, Environmental Health & Public Safety

A) Distribute the “Severe Weather-Tornadoes & Thunderstorms” letter in early March (see attachment 2).

B) Distribute the “Adverse Winter Weather Procedures and Announcements” letter to the campus community in early November (see attachment 3).

C) When severe weather is forecasted to impact the University the Senior Director will direct EP personnel to fill out the “Adverse Weather Planning Considerations Checklist” that will be provided to senior leadership, as needed (see attachment 4).
D) Will activate the EOC when a significant weather event impacts the University.
   1) Request additional departmental personnel, as needed by the specific event.
   2) Reference the Tippecanoe County Travel Advisory Ordinance 2011, as needed.
   3) Provide ELPG a recommendation on suspending or closing the University, as needed by the specific event.

3.3 Marketing and Media

A) Increase awareness of importance of severe weather preparedness.

B) Share information as to where information regarding class cancellations will be posted.

C) Develop and push press releases with regard to weather cancellations. This includes updating social media (Twitter, Facebook and www.purdue.edu (campus home page) and www.purdue.edu/ea (campus status page).

D) Public Information Officer will report to designated EOC upon request from Senior Director, Environmental Health and Public Safety or representative.
Section 4: Direction, Control, and Coordination

4.1 National Incident Management System

A) Purdue University has adopted the National Incident Management System (NIMS) which includes the Incident Command System (ICS)…a standardized, on-scene, all-hazard incident and resource management concept. NIMS is a comprehensive, national approach to incident management that is applicable to all jurisdictional levels and across functional disciplines. The intent of NIMS is to be applicable across a full spectrum of potential incidents and hazard scenarios, regardless of size or complexity.

B) NIMS is designed to improve coordination and cooperation between public and private entities emergencies of any size. Response actions will be based on the ICS. All Purdue First Responders comply with NIMS training requirements.

4.2 Incident Command System—Purdue University

A) Incident command should be used for a severe weather event. If the Incident Commander (IC) requires assistance in managing the incident, he/she will request that the EOC Director activate the Emergency Operations Center (EOC).
Section 5: Communication During and After the Emergency

5.2 The primary objective is to provide timely and accurate information to the university’s stakeholders in response to a severe weather emergency. Marketing and Media will implement their crisis communications plan to ensure this objective is met.

5.3 Communication goals:

A) Identify personnel with communications responsibilities, and develop lines of response and contingency plans.

B) Identify communications approval processes.

C) Provide information about the university’s Adverse Weather Plan, and advise stakeholders where to find information.

D) Ensure stakeholders have access to accurate and timely information to respond appropriately.

E) Gain consensus on speaking with one voice, through internal publications, designated media spokespersons and official Purdue websites.

F) Develop and/or implement crisis communications plan.

5.4 Purdue ALERT

A) Purdue ALERT is the University’s multi-layered emergency warning notification program. There is no way to reach everyone instantly with a single message or system. The objective is to balance the need to provide warnings as quickly as possible with the need to ensure accuracy and provide helpful safety instructions to our campus community. Purdue ALERT may be used to keep the stakeholders informed of a severe weather emergency.

B) Multiple communication systems and processes make up Purdue ALERT. Activation of all or part of the overall warning notification system will be decided on by the Incident Commander and senior leadership, as time permits.

C) The Purdue ALERT Emergency Warning Notification Plan (IEMP attachment 6) provides detailed information on activation protocols and concept of operations.

TO:  Vice Presidents, Deans, Directors, and Heads of Schools, Divisions, Departments and Offices
FR: Carol A. Shelby, Senior Director
RE: Severe Weather - Tornadoes & Thunderstorms

Purdue University is located in a region of the United States that is susceptible to dangerous weather events such as severe thunderstorms and tornadoes. On average, there are 23 tornadoes reported in Indiana annually. Faculty, staff, and students can better prepare themselves to respond to severe weather by considering the following:

I. Preparation - locate the shelter
   a. Locate an accessible basement or corridor in your building.
   b. Identify sheltered areas away from glass & exterior walls.
   c. Stay informed through local media sources when severe weather is predicted or expected.
   d. Obtain a National Oceanic & Atmospheric Administration (NOAA) weather radio with a warning alarm tone. Check the batteries monthly.
   e. Keep a flashlight in your office/work area, and check the batteries once per month.

II. Response - go indoors and shelter in place
   a. A “Tornado Warning” issued by the National Weather Service means atmospheric conditions make a tornado likely or a tornado has been sighted and you must seek shelter immediately. When the All Hazards Outdoor Warning Sirens sound or a NOAA weather radio sounds a warning alarm tone, you must seek shelter immediately (All Hazards Outdoor Warning Sirens will sound for three minutes).
      i. Proceed to the lowest floor of any building.
      ii. Position yourself in an interior corridor away from windows or glass.
   b. A “Tornado Warning” can be considered ALL CLEAR when the National Weather Service states that the “Tornado Warning” has expired. Local radio and television can be used as a source for the expiration of the “Tornado Warning” time period.
   c. Always remain in a place of shelter until you receive an all-clear message or until you are sure the tornado has passed.
   d. Dial 911 (Purdue Dispatch) to report any emergency conditions resulting from the storm.
   e. Stay out of damaged buildings.
   f. Avoid buildings and areas with broken utility lines (i.e., gas, electric, water).

III. Additional Information
   a. For detailed actions concerning Tornado Emergencies, see the web at http://www.purdue.edu/emergency_preparedness/
TORNADO PROCEDURES

Purdue University
West Lafayette Campus

TORNADO WATCH

A “Tornado Watch” is issued when atmospheric conditions are favorable for the formation of tornadoes in a given area. Under these conditions, stay informed by listening to radio or television.

A TORNADO WARNING

A “Tornado Warning” indicates that a tornado has been observed on NWS Radar, or sighted on the ground, and poses a definite threat to a given area. Take cover as soon as possible.

WARNING SIGNALS

- A NOAA weather alert radio will sound the appropriate alert as required by the National Weather Service.
- Outdoor all hazards warning sirens will sound for a period in excess of three minutes. When this occurs, seek shelter, tune into local radio and TV stations to determine the nature of the emergency. No “all clear” is sounded by the sirens.
- A voice message will be broadcast over WBAA, Boiler TV, and other local radio and television stations.

The warning expiration or ALL CLEAR signal is announced by radio and television stations.

WHEN TAKING SHELTER

Proceed to the basement of any building that has a basement or subwalk. Position yourself in an interior corridor of the area away from glass. Be prepared to kneel facing a wall and cover your head.

SEVERE THUNDERSTORMS

The National Weather Service issues severe thunderstorm watches and warnings. Remember that tornadoes are spawned from severe thunderstorms, so monitor NOAA weather alerts for thunderstorm watches and warnings.

SIREN TESTING

The outdoor all hazards warning sirens are tested at 11:00 a.m. on the first Saturday of every month except during periods of adverse weather conditions.
Attachment 3

TO: Members of the West Lafayette Campus Community
FR: Carol Shelby, Senior Director of Environmental Health and Public Safety
DA: November 11, 2013
FE: Adverse Winter Weather Procedures and Announcements

On an ongoing basis, but particularly as we enter the winter months, existing and predicted weather conditions are carefully evaluated by Environmental Health and Public Safety and Physical Facilities to ensure the health and safety of the members of our campus community. In accordance with Purdue University Adverse Weather Conditions policy IV.A.6, dated November 18, 2011 (www.purdue.edu/policies/facilities-safety/iva6.html), special procedures pertaining to classes, operations, parking, pay and/or attendance will become effective for the West Lafayette Campus should action pertaining to adverse winter weather conditions become necessary.

Depending on the nature of existing or predicted conditions, the President of the University or his designee may declare a Wind Chill, Snow, or Ice Emergency for the West Lafayette campus. This decision process will include coordination with appropriate Tippecanoe County, West Lafayette, and Lafayette municipal offices.

Wind Chill Emergency

Conditions
When existing or predicted low temperatures and wind conditions have the potential to pose a severe health threat to students walking to and from class, a Wind Chill Emergency may be declared.

Actions and Impact
- Classes will be suspended.
- Routine operations of the University will continue. West Lafayette Campus employees who can do so safely should report to work:
  - Those who cannot report to work when scheduled must request authorization for the absence from their supervisor under the appropriate university paid or unpaid leave of absence policy.

Snow or Ice Emergency

Conditions
When severe snow or ice accumulation is predicted or occurs, a Snow or Ice Emergency may be declared.

Actions and Impact
- Classes will be suspended.
- Routine operations of the University will be suspended. Most employees will be asked to leave campus and/or not report to work until further notice.
- Parking will be restricted on campus roads as posted.
• Employees pre-designated as Essential Personnel should follow their unit’s procedures and make a reasonable effort to report to campus.
  o By November 1 of each year, affected unit heads will designate Essential Personnel and notify them of their status as such, providing additional unit-specific procedures as appropriate.
  o Essential Personnel are Purdue employees who are required in order to provide the minimum level of service on the West Lafayette Campus (e.g. emergency services, utilities, snow removal, provision of food and housing) and those needed to prevent irreparable damage to research and mechanical systems.
  o If travel is prohibited in the county in which an Essential Personnel employee resides, supervisors should not require the employee to travel to campus.
  o Essential personnel may be required to stay on campus for all or part of the duration of a Snow or Ice Emergency, as directed by their supervisor, in order to ensure the continuing operation of the University at the necessary level.
    • Emergency housing and meals will be provided at university expense to Essential Personnel as needed. Each unit will be responsible for reimbursing the Purdue Memorial Union or other facilities providing housing and/or meals.
• Information on specific pay practices for a Snow or Ice Emergency will be distributed to departments by Human Resources.

Parking Restrictions

When snow or ice accumulation is predicted, parking may be restricted on campus roads as posted. When parking is restricted and during a Snow or Ice Emergency, employees and students are encouraged to utilize parking garages and CityBus to facilitate the clearing of snow and ice from roads and surface lots.

Announcements and Communication

Decisions regarding the declaration of Wind Chill, Snow, or Ice Emergencies will be communicated as quickly as possible, with the intention of sharing decisions that may impact classes and/or university operations no later than 5:30 a.m. on the day to which the action will apply. When Wind Chill, Snow, or Ice Emergencies are declared, the following means of communicating with the campus community may be utilized.

• Purdue email
• Purdue Alert text system
• Posting of announcements to the Purdue homepage (www.purdue.edu)
• Notification of local media
This checklist provides six options to consider after Purdue University experiences inclement weather. Additionally, contact information and resources are listed that may be useful in determining a proper course of action.

</tbody>
</table>
#2. CLASS DELAY (TOMORROW)  Based upon forecasted conditions and certainty of a winter weather event, classes will not begin until 10:00 a.m. tomorrow. Classes with a scheduled start time prior to 10:00 a.m. are canceled. All staff who can safely report to work according to their normal schedule should do so. An update on the status of classes and operations will be provided no later than 8:00 a.m. tomorrow.

#3. CLASS & OPERATIONAL DELAY (TOMORROW)  Based upon forecasted conditions and the certainty of a winter weather event, classes and nonessential campus operations will not begin until 10:00 a.m. tomorrow. Classes with a scheduled start time prior to 10:00 a.m. are canceled and all staff who are not designated as “essential” needn’t report to work until 10:00 a.m. All essential personnel should follow established procedures. An update on the status of classes and operations will be provided no later than 8:00 a.m. tomorrow.

#4. CLASS CANCELLATION (TODAY)  Due to adverse weather conditions that may threaten the safety of students traveling to and from class, all of today’s classes are canceled. Other operations of the university will continue in normal status.

#5. CLASS CANCELLATION & SUSPENSION OF ALL NONESSENTIAL OPERATIONS (TODAY)  Due to adverse weather conditions, all of today’s classes are cancelled. Nonessential personnel should not report to work. Essential personnel should follow established procedures.

#6. CLASSES NOT IN SESSION & SUSPENSION OF ALL NONESSENTIAL OPERATIONS (TODAY)  Due to adverse weather conditions on and near campus, nonessential personnel should not report to work. Essential personnel should follow established procedures.
