When limitations inspire:

I feel a kind of awe, Purdue co-worker says

The next Diversity Dialogue will be held at noon on May 1 in Room D2, Stone Hall at Purdue. Older and younger blacks will discuss their similarities and differences. The public is invited.

By Kevin Cullen

The Purdue University staff at Purdue University's West Lafayette, Indiana, campus, graduated from Purdue with a degree in chemical engineering. But part of the reason for his decision to join the university was because of its strong emphasis on diversity. He was attracted to the program at Purdue because of its strong emphasis on diversity, and he has been working at the university since 1985. He has also been involved in various capacities for the past five years. He believes that the diversity of the students on campus and the opportunities for advancement and job security in the chemical engineering field make Purdue a good place to work. He finds it satisfying to work with people of different backgrounds and experiences, and he enjoys the challenges of working with such a diverse group of people.

Dr. David Swartz, a professor in the College of Engineering, has been working with students on various projects. He has found that working with students is rewarding and has helped him to grow as a person. He has helped students develop their skills and has been able to watch them grow and learn.
