- Throw away perishable items in your refrigerator
- Unplug any unnecessary electronics
- If you have a bike, make sure it is locked and secure
- Take home your summer clothes and don't forget warm clothes for the holidays
- Make sure you have your student ID
- Lock your doors and take your keys!

MAJOR OF THE MONTH: WEB PROGRAMMING AND DESIGN

Purdue's Web Programming and Design major offers students an opportunity to take hands-on and project-driven courses on programming and website design taught by professors and industry partners with real-world experience. Students in this major will gain expertise in human computer interface theory and design, computer graphics programming, geometric modeling, and all aspects of the web development process. Graduates of this major are hired as user interface (UX) designers, web developers, and database administrators at companies such as IBM, Google, Deloitte, and Stormfront productions. Students interested in further education can also opt to earn both a bachelor's and master's degree in computer graphics technology in five years. This is a great major for creative students with a love for technology!
Tips for Practicing Gratitude

Practicing gratitude has been shown to improve one's mental health and build relationships. In this season of thanksgiving, take a minute to reflect on all you can be grateful for by using these mindfulness tips:
