

CHANGEMAKER **BOILER CHANGEMAKER**

The Boiler Changemaker Award recognizes:

ESTHER OLUWAGBENGA

Their nominator wrote:

Esther is an exceptional scientist who is driven by a strong passion for research and a clear sense of purpose. Her dedication and commitment to her work in both teaching and research have made her an invaluable asset in her field.

Her ability to identify and solve scientific problems, explain complex concepts in a simplified and relatable manner further contributed to her effectiveness as a researcher. In addition to her outstanding research contributions, Esther's active participation in leadership programs showcases her drive for personal and professional growth. One of the most commendable aspects of her role as a TA is her willingness to address any questions or concerns raised by students.

Furthermore, her dedication to mentoring undergraduates demonstrates her commitment to fostering the next generation of scientists.

Her guidance and support have undoubtedly influenced the academic and professional trajectories of many young researchers, further solidifying her role as a mentor and educator.

Overall, Esther's research-driven mindset, unwavering dedication, leadership involvement, and commitment to both scientific advancement and mentoring exemplify her exceptional qualities as a scientist and a valuable asset to the scientific community.

Thank you for all you do, Esther!
