

CHANGEMAKER **BOILER CHANGEMAKER**

The Boiler Changemaker Award recognizes:

ANA MORALES-ONA

Ana's nominator wrote:

Besides Ana's commitment with research and her characterized hard work personality (she has taken more than 1,000 soil samples around Indiana just during the summer), she is the kind of student to help others.

She taught her lab partners and other students from her department how to operate drones, and take imagery for research objectives. Ana has written several protocols making students' lives easier when starting to take research measurements.

Ana has taught several classes as a teaching assistant, free of charge. Although grad student life demands a lot, she always find the time to help others.

Thank you for all you do, Ana!

Do you know a grad student who is making big changes? Nominate them at: bit.ly/BCMAWARD
