IGERT: Global Traineeship in Sustainable Electronics
at Purdue University and Tuskegee University

Accepting applications for Fall 2016!

The Integrative Graduate Education and Research Traineeship (IGERT) program, supported by the National Science Foundation, is a multi-disciplinary doctoral traineeship program for students at Purdue University and Tuskegee University.

IGERT Fellowship students will take four IGERT courses (in addition to departmental course requirements) over two years. Students will also participate in a professional internship, an international experience, and outreach, all in the context of sustainable electronics. Each trainee is jointly advised from different academic disciplines.

IGERT trainees receive a $30,000 annual stipend for two years, followed by standard departmental support for the remaining years of study. Students also receive additional support for research supplies and expenses. Students are accepted from various graduate programs at Purdue and Tuskegee including Agricultural & Biological Engineering, Anthropology, Chemistry, Civil Engineering, Environmental and Ecological Engineering, Electrical & Computer Engineering, Engineering Education, Forestry & Natural Resources, Materials Science & Engineering, Mechanical Engineering, and Political Science (other programs are also eligible: please inquire).

Eligibility Requirements: Applicants must be U.S. citizen or permanent resident status (per NSF rules), and concurrently apply for admission to a participating graduate program at Purdue University or Tuskegee University.

Additional Information: Applicants to Purdue: contact Professor Inez Hua (hua@purdue.edu). Applicants to Tuskegee: contact Professor Mahesh Hosur (hosur@tuskegee.edu).

NSF Award Number: 1144843
