LSAMP Indiana is made possible with the generous support of the National Science Foundation Award HRD 07-03443
The National Science Foundation’s (NSF) Louis Stokes Alliance for Minority Participation (LSAMP) program is designed to substantially increase the quantity and quality of students, especially underrepresented minorities who are recruited to and retained in Science, Technology, Engineering, and Mathematics (STEM) disciplines. The LSAMP program assists universities and colleges in diversifying the STEM workforce through their efforts at significantly increasing the numbers of students successfully completing high quality degree programs in science, technology, engineering and mathematics (STEM) disciplines. Particular emphasis is placed on transforming STEM education through innovative recruitment and retention strategies.

LSAMP recruitment and retention techniques and experiences emphasize supporting groups that historically have been underrepresented in STEM disciplines: African-Americans, Alaskan Natives, Native Americans, Hispanic Americans, and Native Pacific Islanders.

LSAMP Support Activities
- Faculty Mentored Undergraduate Research (Academic Year and Summer)
- Professional Development Workshops and Webinars
- Peer Academic Coaching
- Tutoring Services
- Statewide Social Activities
- Annual Research and Enrichment Conference

Financial support is available for LSAMP-eligible students interested in participating in domestic and international research activities. Contact the LSAMP Indiana office for more information.
