Welcome...

With the beginning of a new academic year underway, the LSAMP office under the direction of Toyinda Wilson-Long, is already working hard to assist STEM students in meeting their intended academic goals.

Joining her this year are several new staff and student assistants. Ms. Shanna Brinegar serves as the program’s administrative assistant. Graduate students Quincy Clark and Lydia Magras, along with undergraduate students Tyneshia McGlown and Cameron McGhee are collaborating on academic enrichment offerings, STEM focused campus-wide programs, the annual research conference and the undergraduate research program.

Wilson-Long intends to continue the established interdepartmental initiatives with the science bound office, the Colleges of Science, Technology, Engineering, and Agriculture, the Student Access, Transition and Success Program Office and many other campus student support offices.

LSAMP Indiana is collaboration of eight university campuses including Purdue Main campus, Purdue-Calumet, Purdue-North Central, Indiana University-Bloomington, Indiana University-Northwest, IUPUI, Ball State and Indiana State University.

September 2010

Thursday, September 2
LSAMP
Informational Session
LWSN 1142– 4:45-5:30 pm

Thursday, September 9
Sara Coffman
Center for Instructional Excellence
Understanding Your Learning Style
LWSN 1142– 6:00 –7:00 pm

Fall Semester Study Tables

Academic Enrichment

Every Tuesday
September 7-November 30
Supplemental Instruction for English 106
BRNG 2290 ~ 7:00-9:00 pm

Every Thursday
September 9-December 2
Tutoring 100 & 200 Level Physics Courses
BRNG 2290 ~ 7:00-9:00 pm

2010 Summer Research Program

One of the opportunities LSAMP provides to student participants is the summer research program. Students collaborate with a faculty mentor on an individualized research project, attend academic workshops and present their research findings at the conclusion of the program.

Congratulations to this year’s participants!
