## Participants needed

### for an MRI study!

Magnetic Resonance Imaging (MRI) allows to image the human body non-invasively and without ionizing radiation. We are seeking volunteers in order to optimize novel MRI techniques/ protocols.

Participants must be over 18 years old. Any of the following conditions will exclude you from being able to participate in the study:

- Pregnancy,
- claustrophobia,
- contraindication for MRI on standard safety screening (e.g. metallic implants, pace maker),
- not being able to lie still

If interested, you may obtain your MRI images after the scan session.

If you would like to participate or to find out more information, please contact [Sandy Snyder at: 765-494-6488](tel:765-494-6488) or [snyder33@purdue.edu](mailto:snyder33@purdue.edu)
