Psychology Experiment

- We are looking for female volunteers for a study on brain activity!
- We are recruiting female participants ages 18-60 who carry the FMR1 premutation

Compensation

- Participants will be paid $20 per hour for their time
- Non-local participants will also be reimbursed for their travel expenses

Contact

- If interested, please contact Dr. Bridgette Tonnsen, Dr. Dan Foti, and their research team at babs@purdue.edu

What will participation involve?

Participation may involve:

- Web-based questionnaires
- Have your brain activity recorded (EEG and/or fMRI)
- Complete computer tasks that involve responding quickly to shapes and viewing emotional stimuli
- Have your heart activity recorded
- Answer questions about your feelings and experiences
- The lab visit will last approximately 5-6 hours, often split into a morning and afternoon session

This experiment is associated with the Psychological Sciences Department at Purdue University
