INDIVIDUALS AGE 18-35
NEEDED FOR A MRI SPEECH STUDY

The Motor Speech Laboratory at Purdue University is looking for individuals to participate in a fMRI study on speech. Participants will undergo a battery of cognitive and language tests. Participants will be asked to produce speech samples of a variety of lengths while their speech and respiratory movements are recorded, inside and outside of an MRI scanner. Participants will be compensated $20.00/hour. The study will be approximately 2 hours and can be broken up into 2 sessions.

To participate, you must meet the following criteria:

- Age 18-35
- Native speaker of American English
- Normal language and cognition
- No history of neurological disease
- No history of voice or respiratory problems (including asthma)
- No smoking for the past 5 years
- Pass an MRI safety screener

If you are interested, contact Anny or Sandy in the Motor Speech Laboratory at (765) 494-6488 for more information.
INDIVIDUALS AGE 60+ NEEDED FOR A MRI SPEECH STUDY

The Motor Speech Laboratory at Purdue University is looking for individuals to participate in a fMRI study on speech. Participants will undergo a battery of cognitive and language tests. Participants will be asked to produce speech samples of a variety of lengths while their speech and respiratory movements are recorded, inside and outside of an MRI scanner. Participants will be compensated $20.00/hour. The study will be approximately 2 hours and can be broken up into 2 sessions.

To participate, you must meet the following criteria:
