Options for a Responsive and Accountable Early Childhood Education System in Minnesota

Smarter Reform: Moving Beyond Single Program Solutions to an Early Care and Education System

Louise Stoney
Alliance for Early Childhood Finance
Minnesota Family Impact Seminar
April 25, 2007
“The significant problems we face cannot be solved at the same level of thinking we were at when we created them.”

- Albert Einstein

19th century industrialization supported a model where men engaged in paid work and women took responsibility for unpaid work—most especially caring for young children.

The care and education of children was viewed as a private concern.
New Reality: Dual-Earner Families are the Norm

**Working Married Families (with children under 18)**

- 61% Both Employed
- 31% Father not Mother
- 3% Mother not Father
- 5% Neither Employed

Source: Bernstein & Kornbluh, New America Foundation, 2005

New Reality: Dual-Earner Families are the Norm

**Contribution of Wives' Earnings to Family Income (percent change 1979-2000)**

Source: Bernstein & Kornbluh, New America Foundation, 2005
New Reality: the Knowledge Economy Needs an Educated Workforce

Economic development experts are clear: in order to grow the economy, industry needs skilled, educated employees.

When employers are surveyed about key challenges facing business and industry, they frequently cite employee skills as one of the most serious challenges.

But we still try to solve new problems with old thinking

Despite fundamental shifts in the US economy, workforce and family life:

• We still view early care and education as a private responsibility.
• We assume that if families need help with child care, they can find what they need in the private market. We think it’s just poor families that need help.
We Need a New Approach

The U.S. is now a dual-earner, dual-career society.

We need to grow a future workforce that is both flexible and educated.

To achieve these ends, we must shift from viewing ECE as a private responsibility to creating an early care and education SYSTEM that offers families the supports they need to care for and educate our nation’s children.

Smarter Reform

• Build systems, not just programs
• Ensure universal access
• Focus on quality
• Increase public investment and leadership
• Value children and the families who raise them
We don’t respond with solutions that re-frame early education and care as it affects the whole society. If we did, we’d start creating public policy that looks completely different from what we have now.

System Reform: we name the problem as “systemic” but...

We Want the Solution to Be Simple

Narrow Problem Definition
(lack of preschool)

Target Population:
• Poor Kids,
or
• Employees,
or
• School District

Program:
Create a Preschool Program
• In school
• In community center
• At workplace
But the Problem (and the Solution) is Multi-Faceted

Broad Problem Definition:
(America Isn’t Investing in Human Capital)

Systemic Response:
• Support for range of ECE services & family supports
• Flexible Financial Aid for Families
• Publicly Funded Infrastructure
• Support for Non-Market ECE

Universal Approach

Strategic Investment & Leadership

- ECE is a market-driven system with unique challenges
- ECE is a special market sector because it serves both public and private needs
- The public-good aspect of ECE is vulnerable to market forces (price and convenience) rather than the long-term benefits of quality early education
The Early Care and Education Market is both public & private

- Head Start Program
- Family Child Care Home
- Nursery Schools
- Preschools
- School-Age Child Care
- Non-Profit Child Care Center
- Proprietary Child Care Center
- Relative, Neighbor or Nanny

ECE Revenue

- Consumer tuition is the largest source of revenue
- Private sector has increased dramatically but still less than 4% of total
- Government funding is primarily portable $ (vouchers or tax benefits)
ECE is an Underdeveloped Market

- Lack of effective demand from consumers for high quality services.
- Low profitability due to high labor expenses required by high staff/child ratios.
- No economies of scale in an industry composed of very small businesses.
- Insufficient product differentiation makes it difficult for consumers to obtain information on the quality of early care and education services.

ECE is an Economically Fragile Industry

Bottom-Line Issues for ECE Businesses:

- Ensure Full Enrollment - every day, in every classroom
- Collect Tuition & Fees - in full and on-time
- Maintain High Quality Services (fees cover cost or have 3rd party revenue source)
Market Interventions

- Industry-wide Quality Standards
- Industry-wide Support Systems
- Public/Private Financing Linked to Compliance with Quality Standards
- Intermediaries to launch/administer shared services

Quality Rating Systems

- Promote product differentiation
- Can help increase consumer demand for quality
- Can help reinforce the "public good" portion of early care and education
- Promote & support continuous improvement among early care and education providers.
Financing Linked to Quality Standards

Innovative ideas…

- Tax credits linked to quality (LA, ME, OR)
- Investment capital linked to quality (ME, OR, NC loans to grants)
- Public and private grants for operating assistance linked to quality (PA, MT, OK)
- Access to shared services linked to quality (NC)

---

**Financing ECE Programs**

Total Revenue = Portable + Direct Assistance

**Total ECE Program Revenue linked to standards**

- **Tuition/Fees + Portable Subsidy** (e.g. CCDF vouchers, scholarships, tax credits, etc.)
- **Direct, Institutional Support** (e.g. HS, Pre-K, ECE quality grants, industry-wide investments)
Shared Services

- Group Purchasing
- Staffing & Human Resources
- Food Services
- Family Supports & Services
- Quality Assurance – child assessment, training, mentoring
- Marketing
- Contract Negotiation/Development
- Shared Administration
- Billing and Fee Collection
Families & Children Have Economic Value

Because a significant amount of the time spent caring for children takes place outside the market economy, we tend to think of it as an altruistic act, rather than what it also is -- an investment that is crucial to economic growth

-Nancy Folbre

Families & Children Have Economic Value

What could you buy with your Social Security check, or your IRAs for that matter, if everyone else in your generation had simply forgotten to have children or failed to invest in them?

- Phillip Longman
Supporting Families

- Paid family leave
- Social Security & retirement reforms - to support years spent caring for young children
- High-quality part-time jobs - with health and retirement benefits
- Flexible work schedules
- Opportunities for reduced work hours without undue penalties

Options for a Responsive and Accountable Early Childhood Education System in Minnesota

Extra Slides

(only if needed for further explanation)
Quality
Early Learning is Rooted in Relationships

• skilled teachers, with special training in ECE;
• small class sizes and high adult-to-child ratios;
• age-appropriate curricula and stimulating materials in a safe physical setting;
• a language-rich environment;
• warm, responsive interactions between staff and children;
• high and consistent levels of child participation.

ECE Financing System: What’s needed?

- Institutional Program Support
- Financial Aid for Families
- Publicly Funded Infrastructure
- Support for Non-Market Care
