

Congratulations to our Newly Elected NTSS Officers!

VICE-PRESIDENT ELECT: Jason Cannon, PhD.

Dr. Jason Cannon is an Associate Professor of Toxicology and Fellow, Faculty Leadership Academy for Interdisciplinary Research at Purdue University, where he studies mechanisms of environmentally induced neurodegeneration and teaches several toxicology courses.

SECRETARY-TREASURER: Alison Bernstein, PhD

Dr. Alison Bernstein is an Assistant Professor in the Department of Translational Neuroscience in the College of Human Medicine at Michigan State University, where she studies how epigenetic modifications mediate neurotoxicological effects and gene-environment interactions in sporadic Parkinson's disease and other neurodegenerative diseases.

COUNSELOR: Kristen Ryan, PhD, DABT

Dr. Kristen Ryan is a toxicologist at the National Toxicology Program (NTP) of NIEHS which promotes and conducts research programs to understand how environmental exposures affect the public's health.

POSTDOCTORAL REPRESENTATIVE: Carla Garza-Lombo, PhD

Dr. Garza-Lombo is a postdoctoral fellow at Indiana University School of Medicine in the laboratory of Dr. Michelle L. Block, where she is investigating mechanisms of microglial-induced neurotoxicity—how and why these immune cells become chronically activated to drive central nervous system disease.

GRADUATE STUDENT REPRESENTATIVE: Eduardo A. González, BSc

Eduardo A. González is a PhD candidate in the Pharmacology & Toxicology program at UC Davis in the laboratory of Dr. Pamela Lein. He is studying organophosphate pesticides and chemical threat agents to better understand their neurotoxic effects on the developing brain.
