THE FIVE WS AND A P FOR VIOLENT DEATH IN THE WORKPLACE: WHO, WHAT, WHEN, WHERE, WHY, AND PREVENTION OPPORTUNITIES

LAURA SCHWAB REESE, PH.D.
Assistant Professor
Health & Kinesiology

Tuesday, April 23, 2019
FRNY B124
4:30 p.m.

Research Interests:
The primary goal of Dr. Schwab Reese’s work is to inform, develop, and evaluate interventions to reduce intentional and unintentional injuries. She has worked in a wide range of injury topics, including intimate partner violence, suicide, opioid overdose, traffic safety culture, bullying, teen driving, sports injury, and child abuse, but she is particularly interested in primary prevention of violence perpetration. Her approach to violence prevention is guided by a theoretical framework that suggests internal factors, such as mental health, substance use, and adverse childhood experiences, contribute to a behavioral predisposition to perpetration. However, the physical and psychosocial context may escalate or deescalate this predisposition to violence. As a trained counselor, health educator and public health researcher, her focus is understanding and intervening at the intersection of the internal and external environment.

Host: Dr. Ellen Wells
