Arconic Wheel and Transportation Products invented the first forged aluminum truck wheel in 1948—and by doing so, we created an entire industry. Seven decades later, we’re proud to be the global market leader in the forged, aluminum heavy-duty truck wheel market, holding the number one position. We’ve helped customers around the world to increase payload while saving fuel and reducing maintenance by switching out heavy steel wheels for lightweight aluminum.

The Environment, Health and Safety (EHS) Manager is responsible for Arconic Wheel's and Transportation Products (AWTP) Business Unit (BU) at the Cleveland, Ohio location. The main responsibility is directing the safety and health activities to ensure regulatory and Arconic EHS standard compliance and successful implementation of EHS management system.

Job Responsibilities:
- This position must influence plant leadership, engineering and other support staff to perform at a high level for EHS. Build and maintain external relationships which include contacts with Division/Arconic EHS staff, government representatives, suppliers, equipment vendors, contractors and others on matters related to EHS; Provides support to the Arconic Forgings and Extrusions (AFE) EHS Manager for Environmental Compliance. Represents AWTP in executing the Site Master Service Agreement.
- Spend time on the plant floor being visible and interacting with employees on the EHS Process; Plan, direct, and coordinate EHS compliance activities through functional teams, direction of AWTP Manufacturing Mgr. and direction from AWTP EHS Director;
- Act as key EHS liaison with location manufacturing and maintenance organizations assisting in the execution of their strategic and tactical EHS plans;
- Lead the development and implementation of Health and Safety programs and activities for the AWTP plants to achieve, maintain and exceed compliance with relevant regulatory laws and regulations as well as comply with Arconic policies, standards and procedures;
- Coordinate location Human Performance (HP) implementation including, Behavior Safety Observation Processes and critical safety compliance audits of employee behaviors and plant activities;
- Facilitate implementation of safety and health systems including Industrial Hygiene programs;
- Lead the coordination and completion of designated Health and Safety Arconic Self-Assessment and Testing (HS ASAT) protocols and overall ASAT process;

Basic Requirements:
- Bachelor’s Degree from an accredited institution
- Minimum of five years of EHS-related experience in a manufacturing and / or plant work environment

Preferred Requirements:
- Bachelor’s Degree with an EHS focus, or an Engineering degree from an accredited institution
- Certified Safety Professional (CSP)
- Minimum of ten years of EHS-related experience in a manufacturing and / or plant work environment
- Experience working with a union workforce

This position is subject to the International Traffic in Arms Regulations (ITAR) which requires U.S. person status. ITAR defines U.S. person as an U.S. Citizen, U.S. Permanent Resident (i.e. 'Green Card Holder'). Employees must be legally authorized to work in the United States. Verification of employment eligibility will be required at the time of hire. Visa sponsorship is not available for this position.

Other Details: Relocation assistance is provided. Expected travel is less than 5%.
