Environmental Engineer – Bloomsburg PA
Arconic Building and Construction Systems

This opening is in our Kawneer Bloomsburg facility (Bloomsburg, PA). We are the leading manufacturer of architectural aluminum products and systems for the commercial construction industry. Kawneer is part of Arconic’s global Building and Construction Systems (BCS) business unit, which manufactures and markets architectural systems and products in North America, Europe, Asia and the Middle East.

The Environmental Engineer will be responsible for managing the day-to-day environmental compliance programs, permit requirements and providing technical oversight and expertise to EHS and other site leaders. This position will actively participate in the company audit and self-assessment program, incident investigation and corrective action process and continuous improvement activities.

Essential Job Functions

- Maintain all records and documents as they pertain to the Environmental Management System.
- Perform site compliance sampling and submission to lab for analysis.
- Assess and monitor site compliance with all local, state, and federal environmental regulations. Works with plant personnel to insure compliance.
- Develop and conduct required environmental training.
- Prepare applicable regulatory / company deliverable reports.
- Facilitate environmental incident prevention and investigation processes and prepare reports to appropriate agencies.
- Direct the facility’s waste minimization program.
- Conduct site regulatory compliance audits.
- Monitor waste streams and waste products to ascertain ways to eliminate or minimize waste generation.
- Monitor wastewater treatment system to ensure permit compliance and direct water conservation activities.
- Interface with all levels of the organization and external agencies, vendors and contacts.

Minimum Qualifications

- B.S. Degree in Environmental Engineering or related field.
- 3 – 5 years of industrial environmental compliance experience.

Preferred Qualifications

- Broad familiarity with all environmental media (i.e., air, water/wastewater, waste).
- Experience with hazardous waste management inspections and manifests.
- Experience with Environmental Management Systems, training, preparation and/or Implementation is a plus.
- Prior experience with preparation of environmental deliverables is a must (i.e. SARA, RCRA, DMR’s).
- Strong organizational, interpersonal, and oral/written communication skills; proficient in MS Office products.
- Proficient with math, analytical and problem solving skills

Employees must be legally authorized to work in the United States. Verification of employment eligibility will be required at the time of hire. Visa sponsorship is not available for this position.

Other Details: Relocation assistance is negotiable. Expected travel is less than 5%.
