

## Request to Use Subjects from the Psychology 120 Subject Pool

Please submit an electronic file to the SONA Coordinator

IRB Research Project Number \_\_\_\_\_ Sona Systems Number(s) \_\_\_\_\_

1. Title of protocol **and** the title to be used with the PSY 120 subject pool, if different:

---

2. List every person who will have contact with subjects, as well as their capacity (e.g., experimenter, assistant, or confederate). Attach an additional page if necessary. Email addresses are required for new Sona accounts. Attach CITI Certification for all undergraduates.

FULL NAME	FAC/GRAD/UNDRGRD	CAPACITY	EMAIL ADDRESS
_____	_____	_____	_____
_____	_____	_____	_____

3. Attach the description of your study's procedures that you plan to post to the Sona Systems program. This description must provide enough information to potential subjects so they will have a basic understanding of what they can expect when participating in your study. List everything you plan to post to the Sona program, including restrictions, duration of the session, and experiment credits to be awarded.
4. Attach **1 copy of your informed consent document** that include the IRB Research Project Number at the upper left; and the Sona Systems number(s), and the title to be used with the PSY 120 subject pool centered under the heading Research Participation Consent Form. T
5. Attach a debriefing document (and script if you plan to debrief orally). NOTE: PSY 120 textbook references must be updated each semester, noting which text is used by each instructor. Current textbooks and lists of instructors are available from the SONA TA. This document also must include two outside references, no more than one of which can be a book. This debriefing requirement provides a learning experience for the participant and reduces participant apathy (and hostility).

NOTE: You must use the same title on everything subjects will see, e.g., the title used in the Sona Systems program; the consent form(s), and the debriefing document.

\_\_\_\_\_

This request is based on a research protocol which has previously been approved by the Purdue University Institutional Review Board (IRB) and is considered to be in active status by the IRB. This research will be conducted in accordance with all Federal, State, University, and Department procedures and regulations.
